Airport Traffic Report

**AIRPORTS OF THAILAND
PUBLIC COMPANY LIMITED**

FOREWORD

In 2021, the air traffic demand was still disrupted by COVID-19 especially on passenger traffic. However, air cargo demand showed positive sign which benefitted from e-commerce boom. Despite the variety of the COVID-19 vaccination in 2021, Thailand had faced greater crisis than the year 2020 as the virus was spread throughout the country with several variations. The widespread of new Beta and Delta variants since April 2021 forced the Thai government to issue a Declaration of an Emergency Situation once again, including the domestic air travel suspension during July and August 2021.

On the other hand, Thai government introduced the Phuket sandbox program in July 2021 to accommodate international tourist who has completed the requirement of vaccination. The program was received positive feedback and therefore the government announced to reopen the country in October 2021 with more relief of entry rules. Although the number of international passengers slowly recovered since then, domestic passenger rapidly increased since October 2021 due to the significantly lower number of new cases within the country before hit by Omicron variant at the end of the year.

This report effectively provides statistic data of the 6 AOT's airports covering aircraft movement, passenger, and cargo in many dimensions. The readers can easily access to numerous statistical documents, and gain benefits from in-depth detail of data.

AOT is prepared and will be ready for the post COVID-19, new world of challenging travel norms for the upcoming years.
