

Air Traffic Report

AOT Operates The World's Smartest Airports

Forward

Airports of Thailand Public Company Limited or AOT operates 6 airports which are Suvarnabhumi Airport, Don Mueang International Airport, Chiang Mai International Airport, Hat Yai International Airport, Phuket International Airport and Mae Fah Luang – Chiang Rai International Airport.

Suvarnabhumi Airport and Don Mueang International Airport still were main airports which served 72.9% and 74.5% of AOT's aircraft movement and passenger number.

Interestingly, Mae Fah Luang – Chiang Rai International Airport with the highest growth rate in 2017 of both aircraft movement and passenger number (21.0% and 21.5% respectively). Phuket International Airport was the second with aircraft movement growth of 8.5% and passenger growth of 11.6%.

Chiang Mai International Airport's and Hat Yai International Airport's aircraft movements and passenger numbers continued to grow with aircraft movement growth of 4.0%, 7.0% and passenger growth of 8.3%, 9.1% respectively.

AOT AIRPORTS TRAFFIC OVERVIEW

Thailand's air transportation industry tended to grow continuously thanks for the positive factors arising from both domestic and international tourism growth. Airlines increase their flights in respond to an increased in air travel demand. Therefore, the number of aircraft movements at the 6 AOT's airports grew by 5.41% to 833,084 flights.

The total number of passengers handled at the 6 airports was greater than 133 million, an increase of 9.37%. The total freight and postal parcel volume amounted to 1.60 million tons, increased by 9.68% when compared with those numbers of the previous year. (see table 1)

Table 1: AOT Air Traffic Year 2017

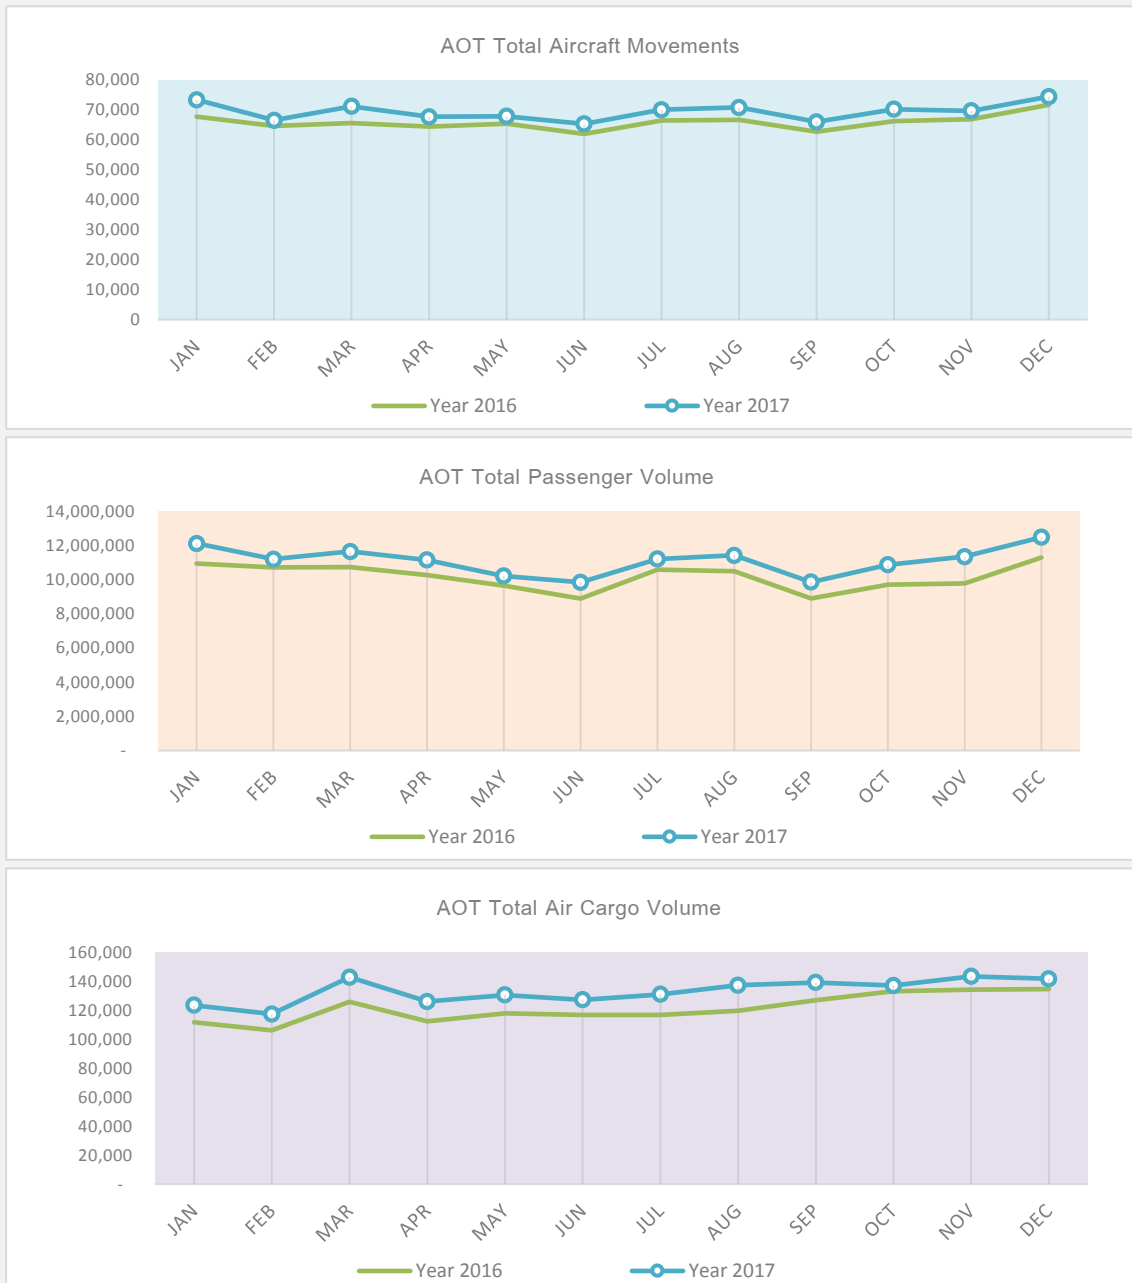

Airports	International	%Change	Domestic	%Change	Total	%Change
Aircraft movements (flights)

Seasonal air traffic demand

The high season for tourism throughout Thailand starts from October through late February or early March. The climate during this time tend to be cooler than the rest of the year but still much warmer than those of North American and European's. Low season begins in April and lasts until October, with average temperature around 35°C and occasional rain storm.

Therefore, most travelers tend to avoid trip during this period and more likely to travel during high season instead. Passenger volume also increases in July and August when families travel back and forth from overseas school holidays. However, air cargos are more relying on domestic and foreign merchandise trade rather than weather of the country. (see chart 1)

Chart 1: AOT's monthly total passengers, aircraft movement and air cargo volume

Number of Scheduled Airlines in 2017

The scheduled commercial flights in 2017 were operated by 136 airlines. From those numbers, 19 airlines provided airfreight services.

For domestic routes, scheduled flights were provided by 9 airlines including Thai Airways International, Bangkok Airways, Nok Air, Thai Air Asia, Kannithi Aviation, Thai Lion Air, Thai Smile and Thai Vietjet and Sabaidee Airways.

Number of Scheduled Routes in 2017

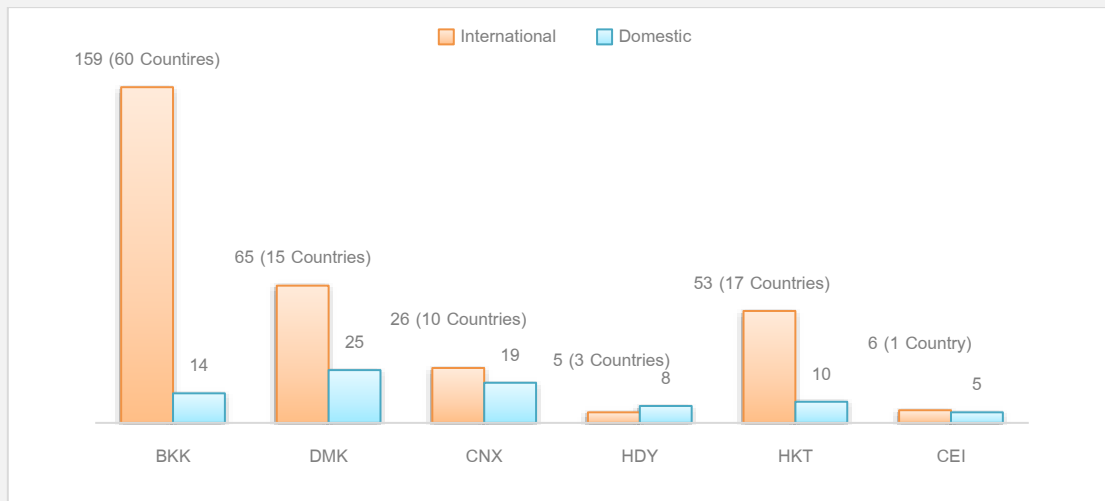

Aviation industry in Thailand tended to be more intense competition, airlines continued to increase their capacities by importing new aircrafts to maintain competitiveness. Hence, number of routes and frequencies expanded widely.

Domestic air transport also expanded throughout the country. The increasing number of LCC's aircrafts lead to the increase of flight and route

services from Don Mueang to other airports in Thailand.

Regional airports also experienced overseas growth. Chiang Mai and Phuket attracted more foreign travelers especially from China. The result was more number of scheduled routes services in 2017.

Chart 4: Number of scheduled route services

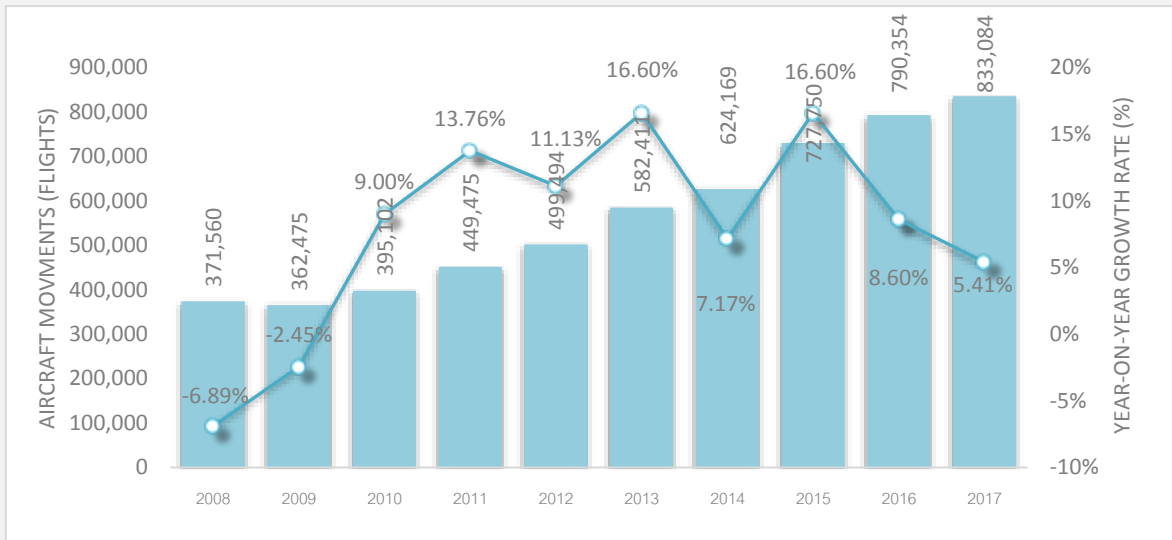

1. Commercial Aircraft Movements

Aircraft movements continued to grow over the past years. Despite diminishing growth rate from last year, the demand from overseas and domestic low cost airlines helped push the number of aircraft movements close to each airport's runway limit.

As a result, total commercial aircraft movements handled by AOT's 6 airports reached 833,084 flights, a 5.41% increase from 2016 and a 9.39% compound average annual growth from 2008-2017. (see chart 5)

Chart 5: AOT's commercial aircraft movements 2008-2017

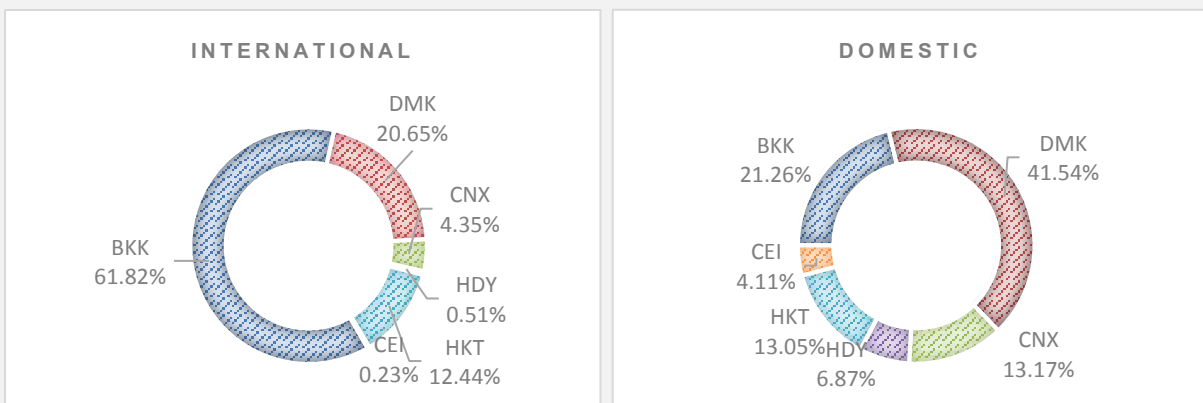

1.1 Aircraft Movements Proportion between AOT's Airports

AOT's airport accommodated 427,490 international and 405,594 domestic commercial aircraft movements, with 5.62% and 5.18% increase respectively. The proportion between international and domestic movements were 51 to 49.

Out of those numbers, 61.82% of international flights were accommodated by Suvarnabhumi Airport, whereas 41.54% of domestic flights were handled by Don Mueang International Airport. (see chart 6)

Chart 6: AOT's commercial aircraft movement proportions

1.2 Scheduled vs Non-scheduled Operations

For normal civil aviation flight, the type of operation can be generally categorized into international, domestic, scheduled and non-scheduled services. Chart 7 shows the proportions between those commercial flight operations. As number of aircraft movements reached full capacity of runway in

some hours, the available slots for non-scheduled operation tended to be lower since they were allocated to scheduled services. Moreover, airlines tended to sacrifice their domestic slot and swapped for international flight instead since international flight normally generated greater yield.

Chart 7: Proportion between International, domestic, scheduled and non-scheduled flights

1.3 Fleet Mix

Fleet mix described the number of aircraft movements classified by the ICAO’s Aerodrome Reference code, which categorized aircraft types to simplify whether an aircraft is able to use a particular aerodrome. The aerodrome reference code is included in Chapter 1 of Annex 14 and consists of two elements – code number and letter. In this report, the letter code for element 2 is corresponds the greatest wingspan or the greatest outer main gear wheel span with code letter of aeroplanes for which the facility is intened. (see table 2)

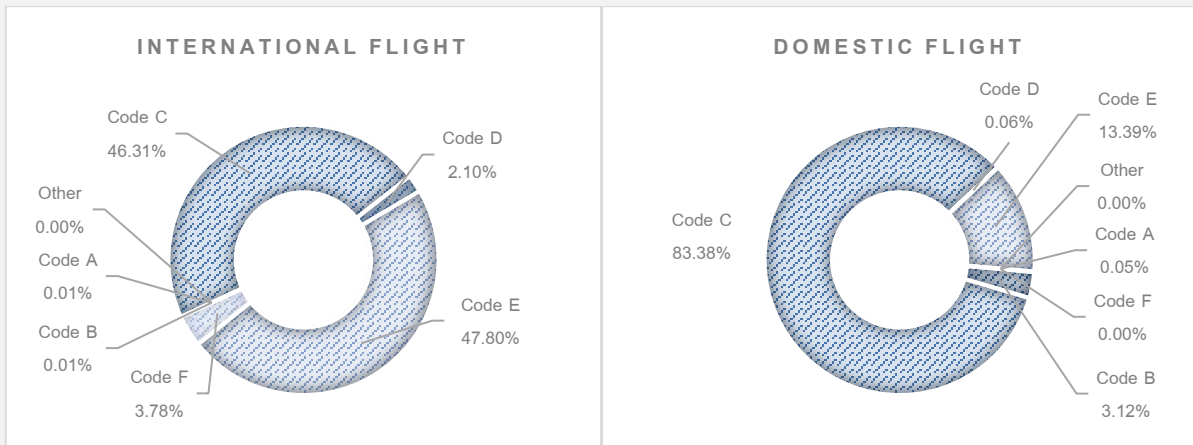

Table 2: ICAO’s Aerodrome reference code

Code element 2		
Code Letter (3)	Wingspan (4)	Outer main gear wheel span (5)
A	<15 m	<4.5 m
B	15 m but <24 m	4.5 m but <6 m
C	24 m but <36 m	6 m but <9 m
D	36 m but <52 m	9 m but <14 m
E	52 m but <65 m	9 m but <14 m
F	65 m but <80 m	14 m but <16 m

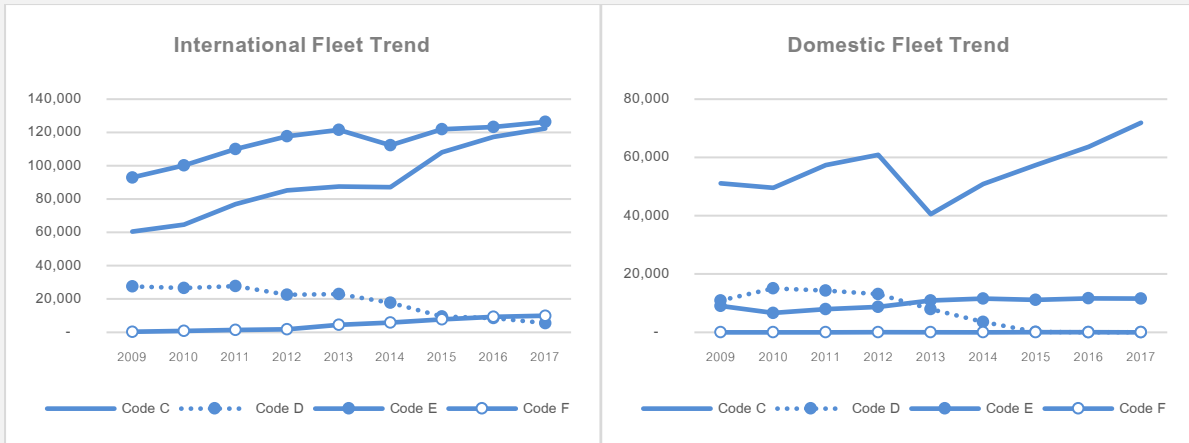

Source: ICAO, ANNEX 14. 2004, Table 1-1 Aerodrome Reference Code, page 1-8.

Generally, the popularity of code D has become lower over the years since airlines tended to preferred either code E & F for long-haul flights, or code C for short-haul operations. (see chart 8-13)

1.4 On-Time Performance

Airport's on-time performance describes the punctuality of airlines' departure flights for each airport. It is calculated by using difference between scheduled departure time (slot time) and the actual time aircraft is push-off from parking bay. The more numbers show that airports may experience congestion or delay of departure flight. Please note that all reason of delays were ignored in this topic i.e. all data of scheduled departure fights were calculated.

Chart 14: Average difference actual to scheduled departure time

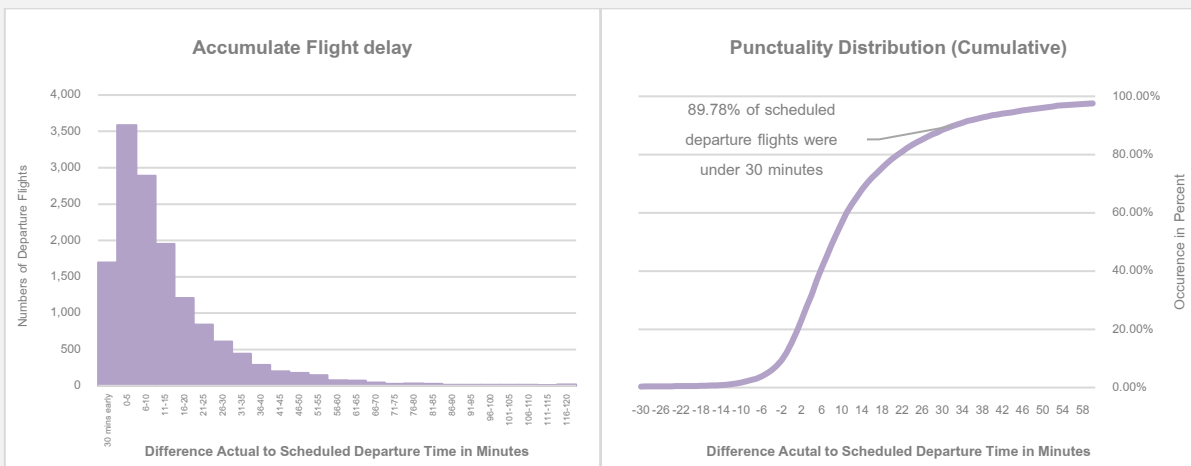

Chart 19: Flight delay of Phuket International Airport in 2017

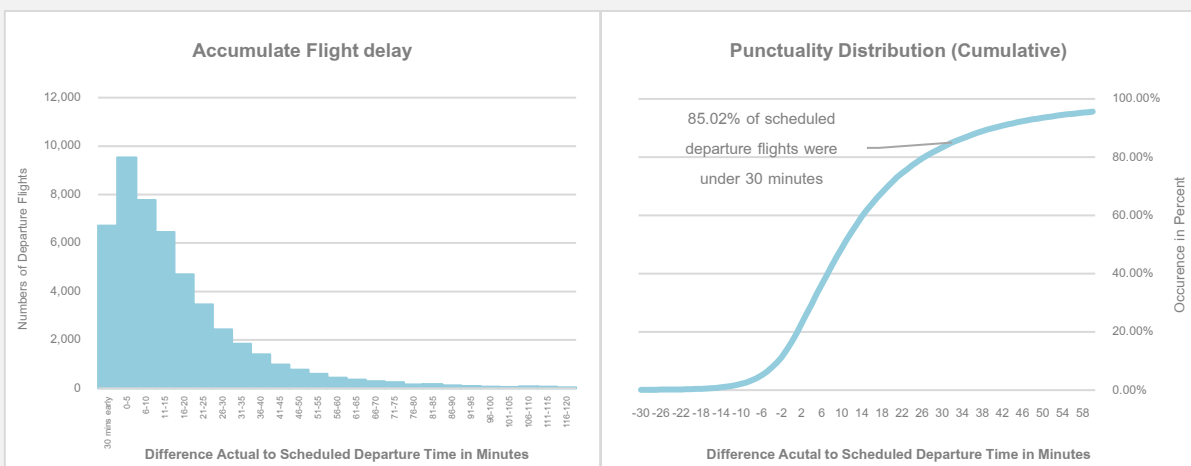

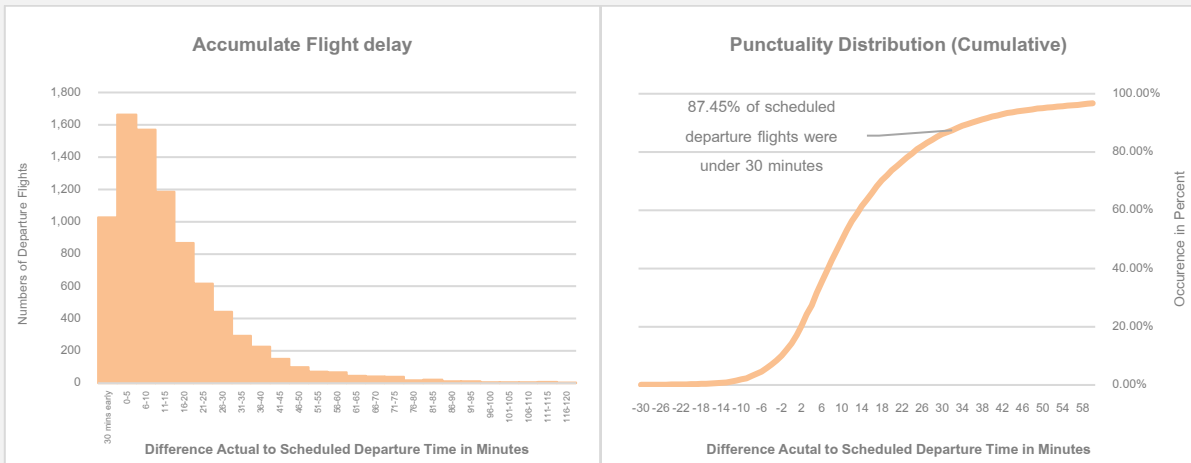

Chart 20: Flight delay of Mae Fah Luang Chiang Rai International Airport in 2017

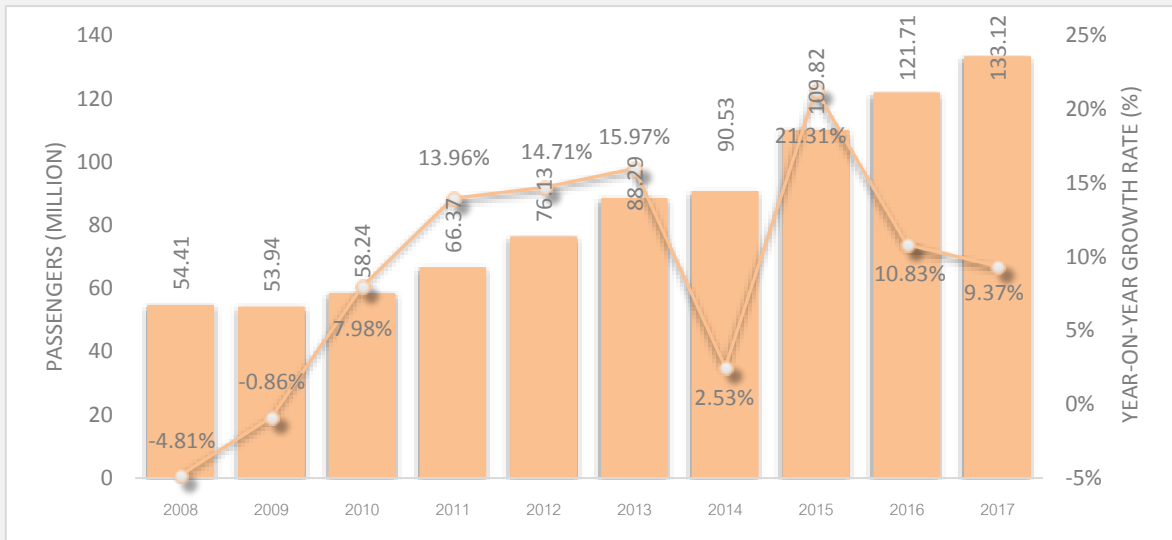

2. Passenger Throughput

The number of passengers significantly increased for the past decade with a 10.45% compound average annual growth rate. Local low cost carriers and China's airlines played an important role in boosting local tourism throughout Thailand. In

2017, AOT's airports accommodated 133.12 million passengers with 9.37% growth. The majorities of passenger traffic were taken place in both Bangkok airports, which consisted of Suvarnabhumi and Don Mueang, (see chart 21)

Chart 21: AOT's passenger volume 2007-2016

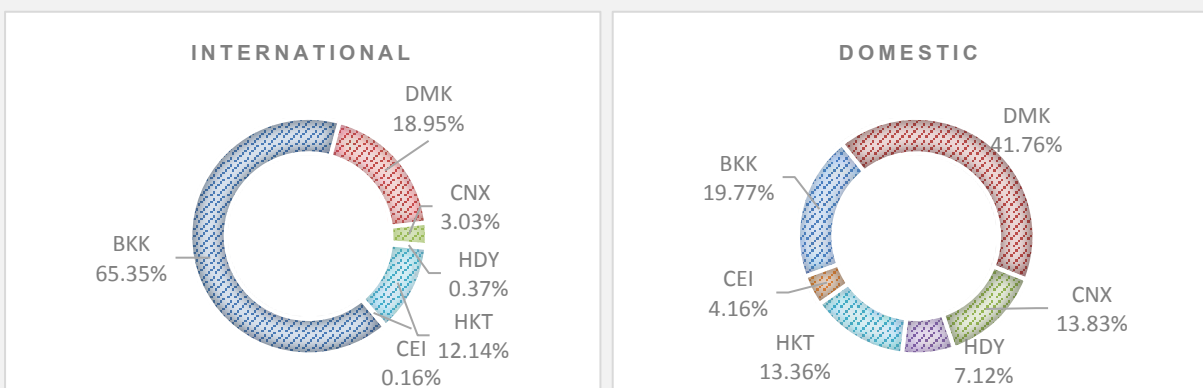

2.1 Passenger Traffic Proportion between AOT's Airports

In 2017, AOT's 6 airports accommodated 75.78 million international and 57.34 million domestic passengers, with 10.76% and 7.58% increased respectively. The proportion between international and domestic movements was 57 to 43.

Out of those numbers, 65.35% of international passengers were travelled by using Suvarnabhumi Airport, whereas 41.76% of domestic passengers were travelled by low cost airlines at Don Mueang International Airport. (see chart 22)

Chart 22: AOT's passenger traffic proportions

2.2 Scheduled vs Non-scheduled Passengers

Depending on type of flight operation, passenger can either travel with scheduled or non-scheduled flights, i.e. regular services, charter or private flights. Most of AOT passengers travelled by scheduled services, especially for domestic where most of passenger were handled by scheduled operations of low cost airlines. (see Chart 23)

The proportions reflected the same direction as flight operation, while airport capacities were limited, most slots were given to schedule operation and therefore only few were left for those remaining non-scheduled. More details can be seen in table 9 of each airport under the Statistic Reports section.

Chart 23: Proportion between International, domestic, scheduled and non-scheduled passengers

2.3 Airlines Performance

The airlines performance ranks the number of passengers carried by airlines in 2017. This included all type of passengers; i.e. embarked, disembarked, transit, transfer, scheduled and non-scheduled operations.

Thai Airways International remained topped by international passenger at Suvarnabhumi Airport for long-haul flights, whereas low cost airlines dominated domestic markets and short-haul flights.

More details can be seen in Airlines Annual Traffic section of each airport under the Statistic Reports.

Chart 24: Suvarnabhumi Airport's top airlines by number of passengers

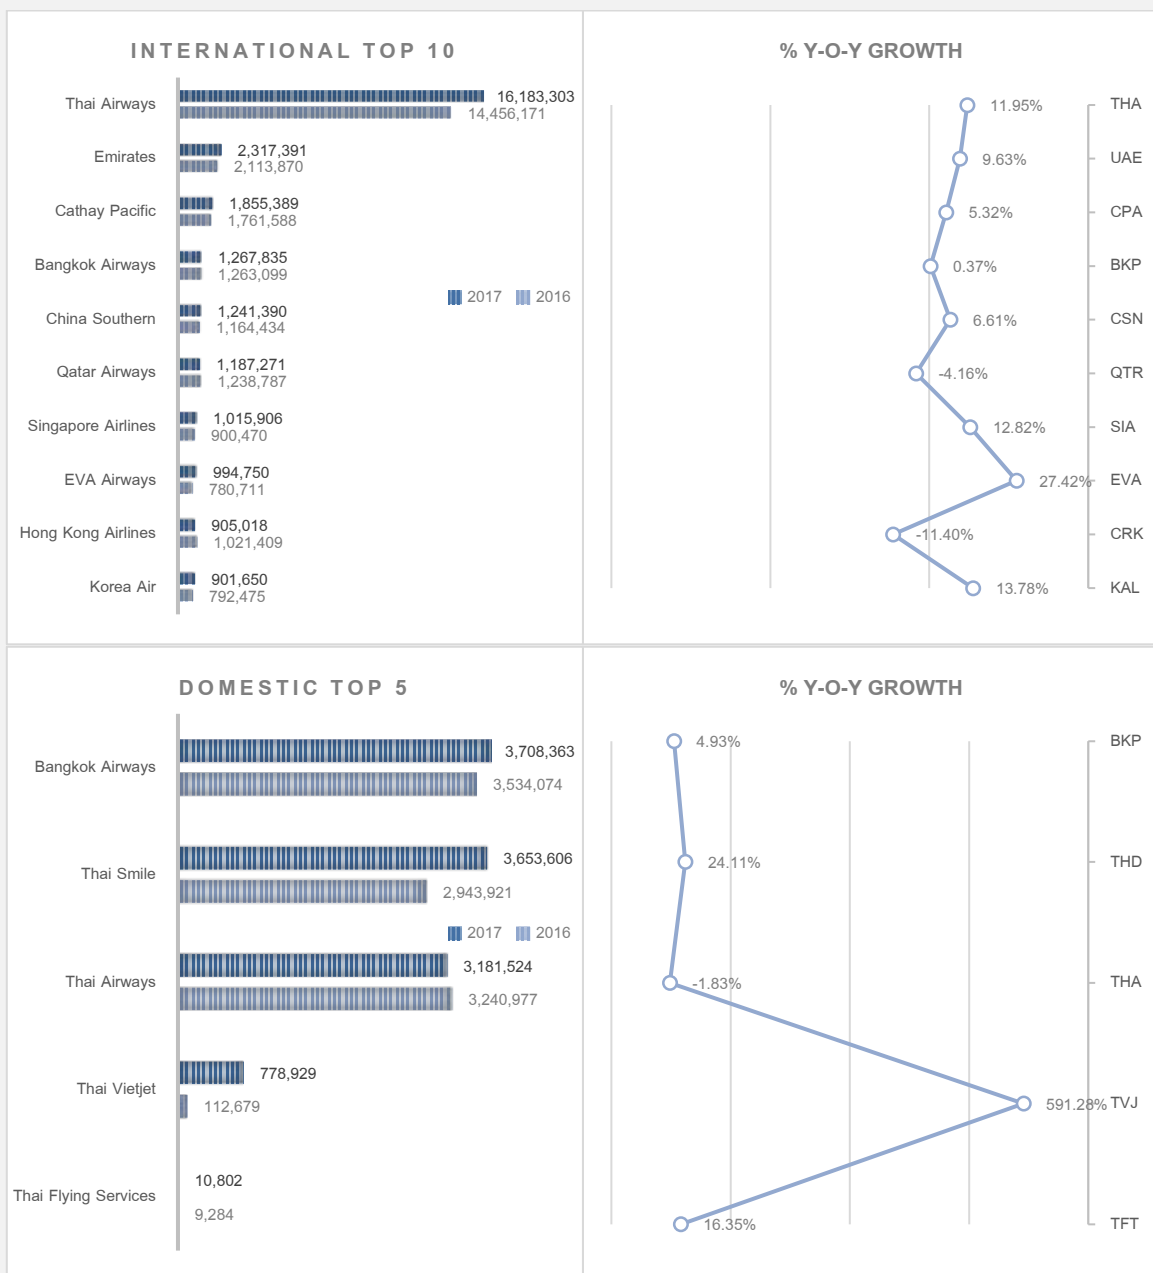

Chart 25: Don Mueang International Airport's top airlines by number of passengers

Char 27: Hat Yai International Airport's top airlines by number of passengers

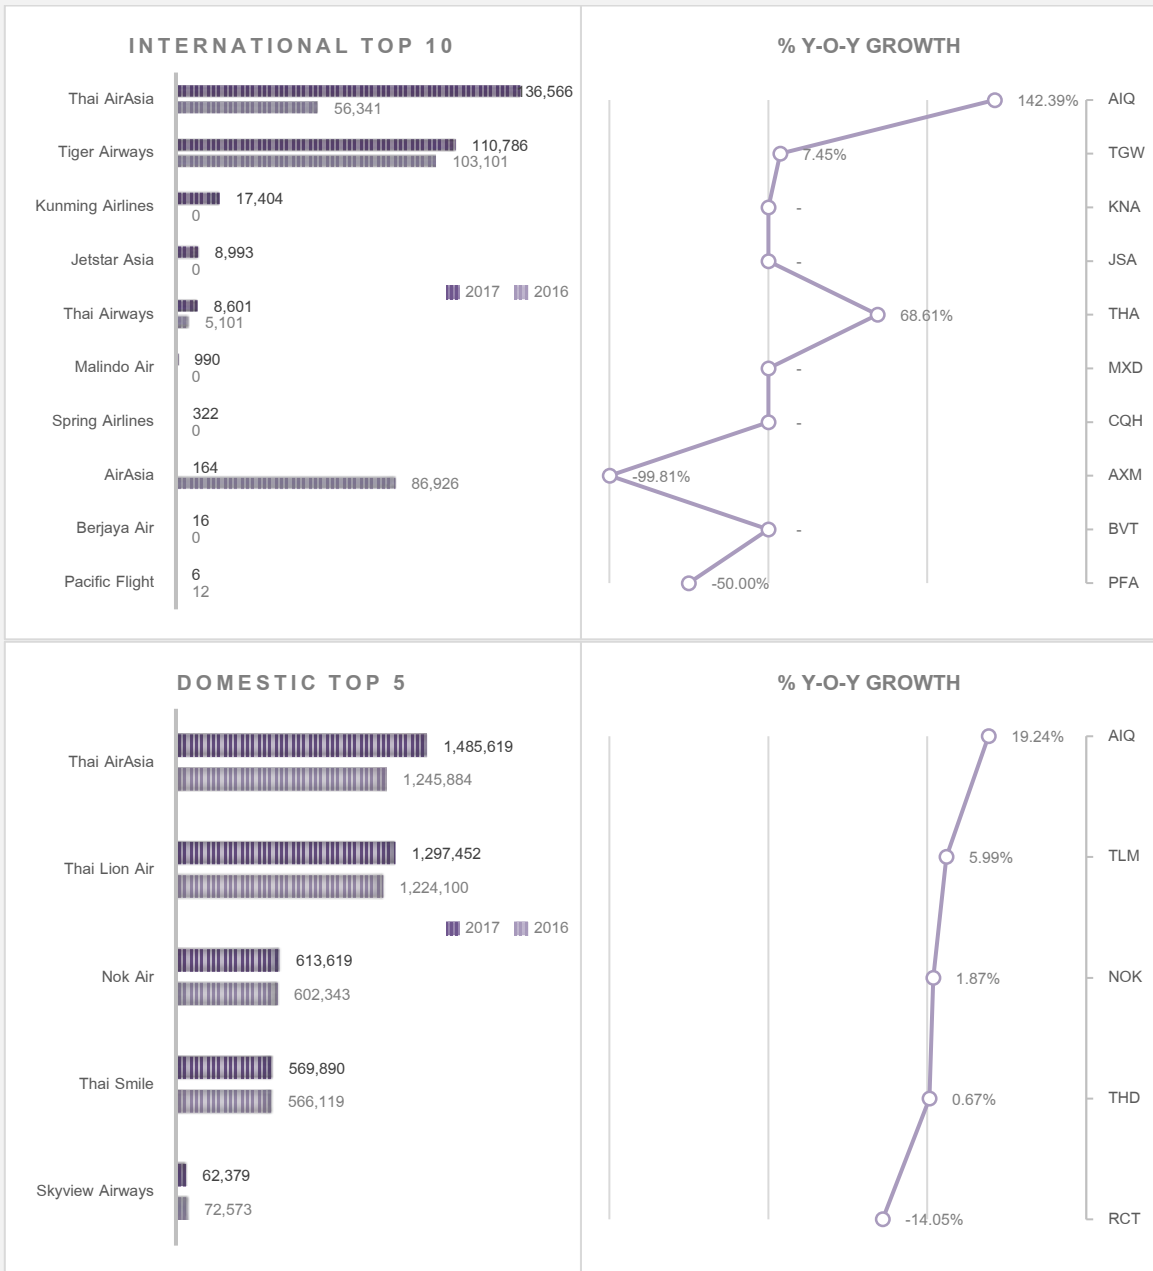

Chart 28: Phuket International Airport's top airlines by number of passengers

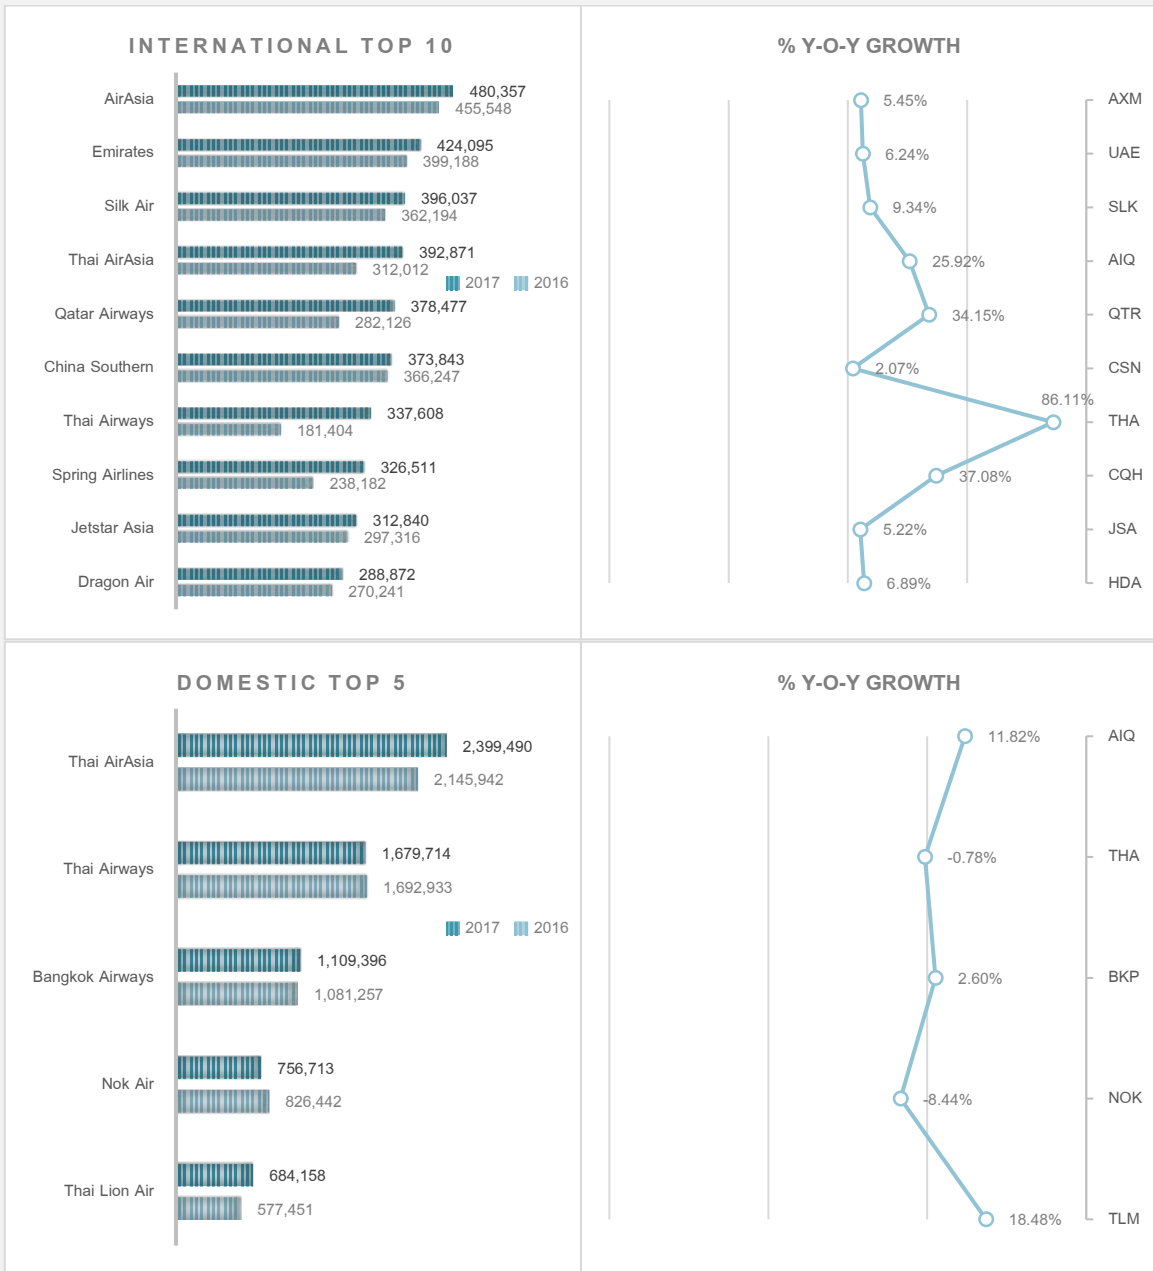

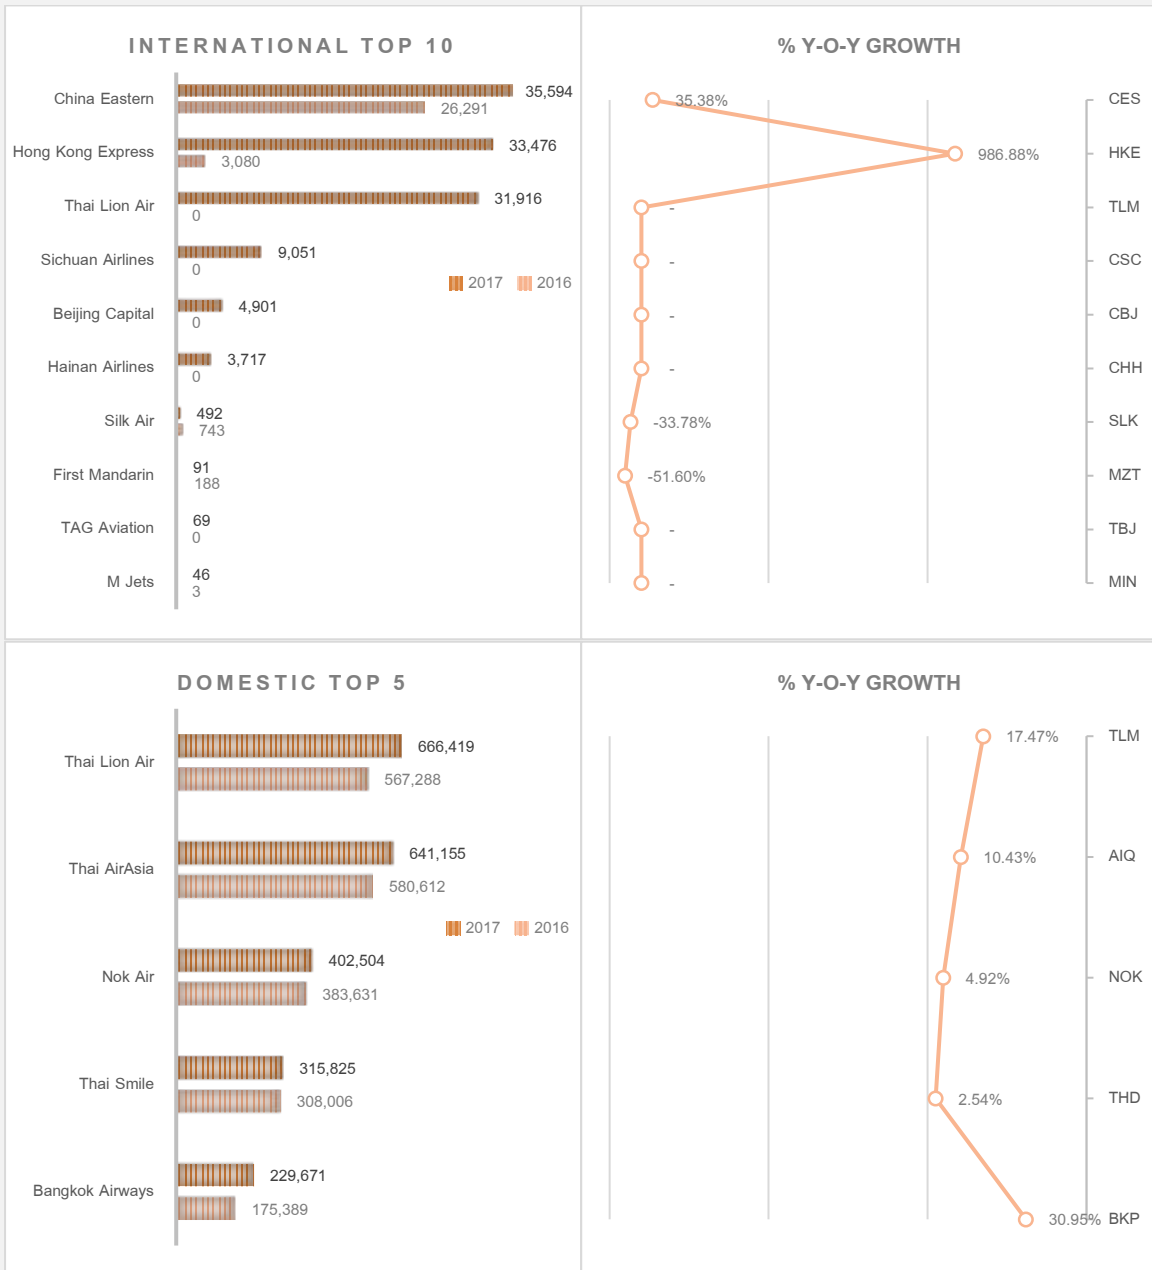

Chart 29: Chiang Rai International Airport's top airlines by number of passengers

2.4 Routes Traffic

The routes traffic ranked the airport by number of origin/destination passengers, regardless of type of flight operations.

In general, top-rank international cities-paired of each airport were within Asia-Pacific. For domestic

market, the most travelled cities connected to Bangkok remained big cities such as Phuket and Chiang Mai. On the other hand, from regional airports point of view, the highest volume of passengers was Don Mueang to which travelers travelled by low cost airlines. (see Chart 30-35)

Chart 30: Suvarnabhumi Airport's top cities-paired by number of passengers

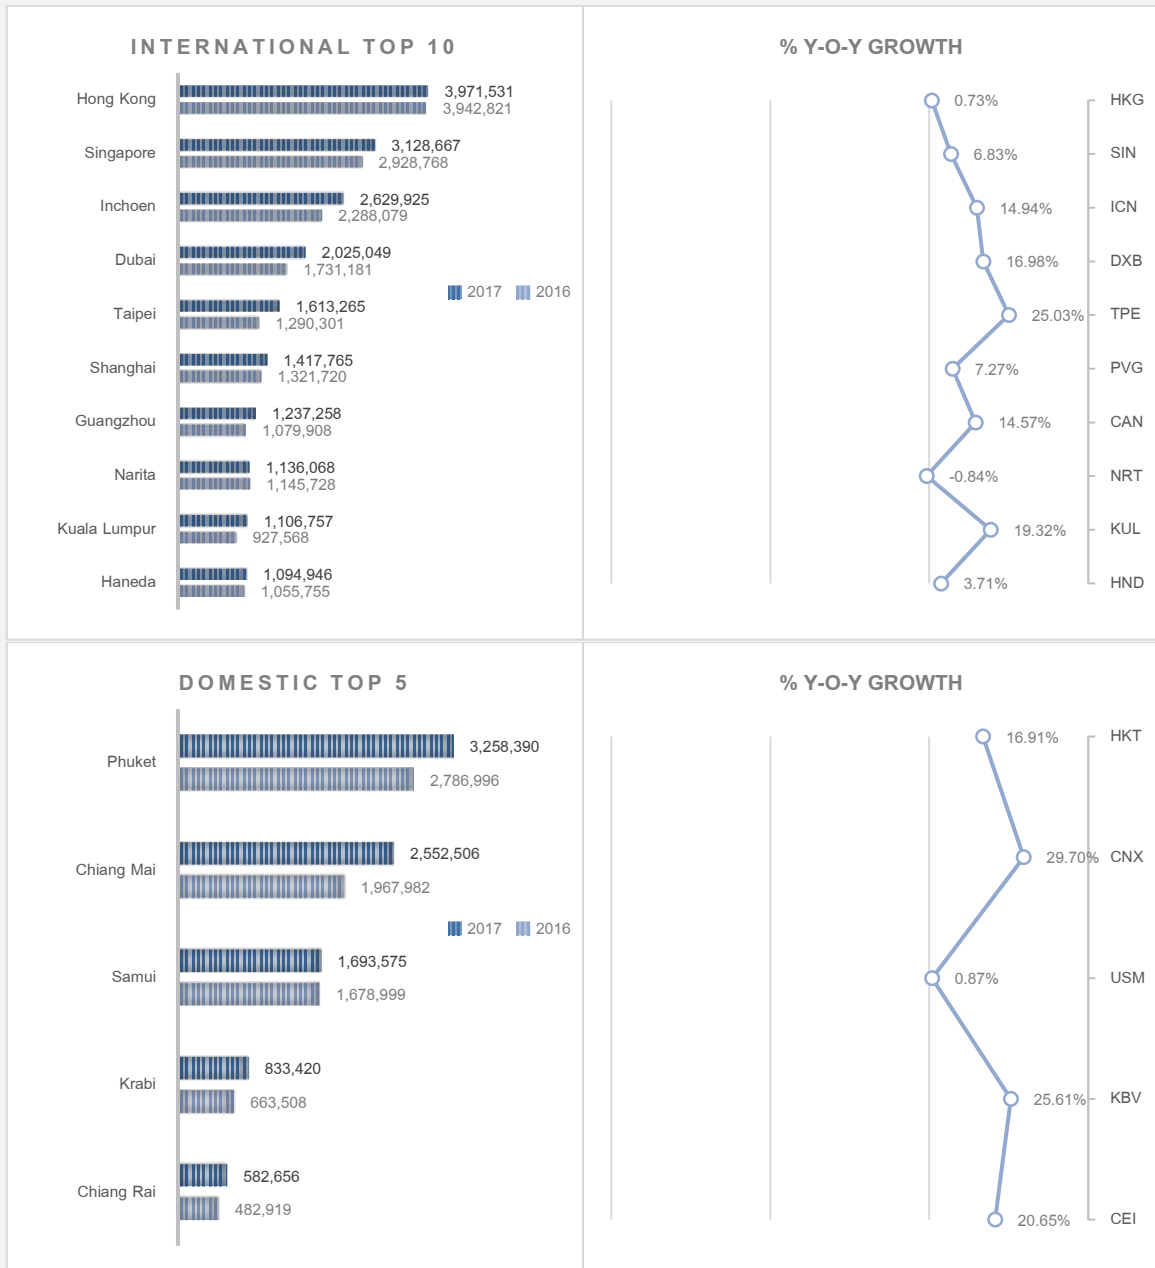

Chart 31: Don Mueang International Airport's top cities-paired by number of passengers

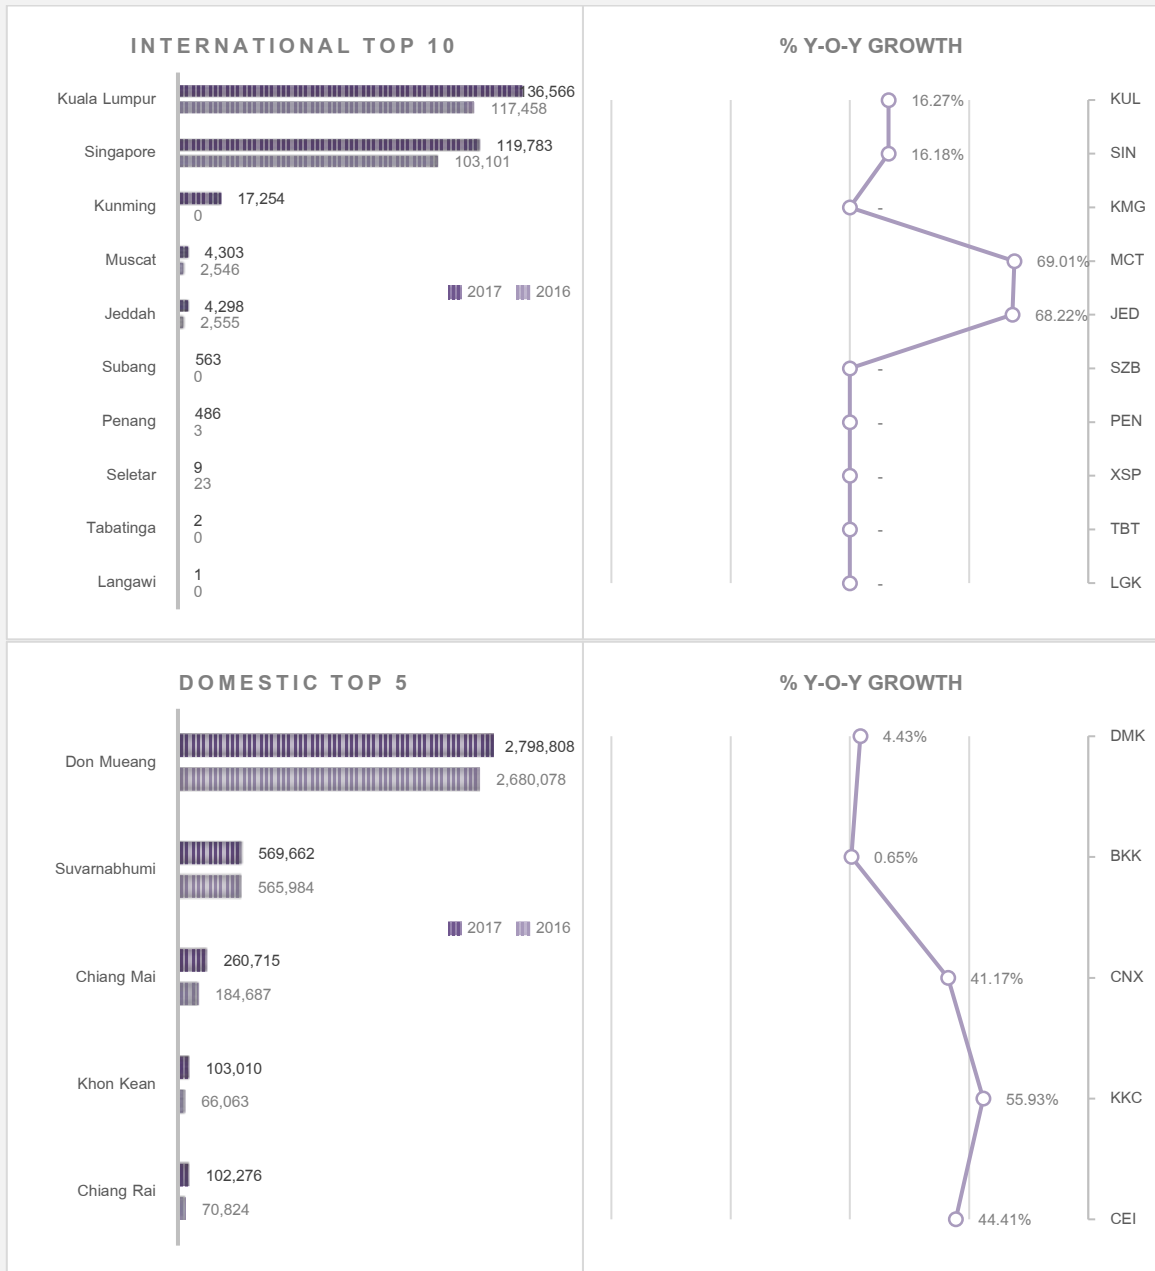

Chart 34: Phuket International Airport's top cities-paired by number of passengers

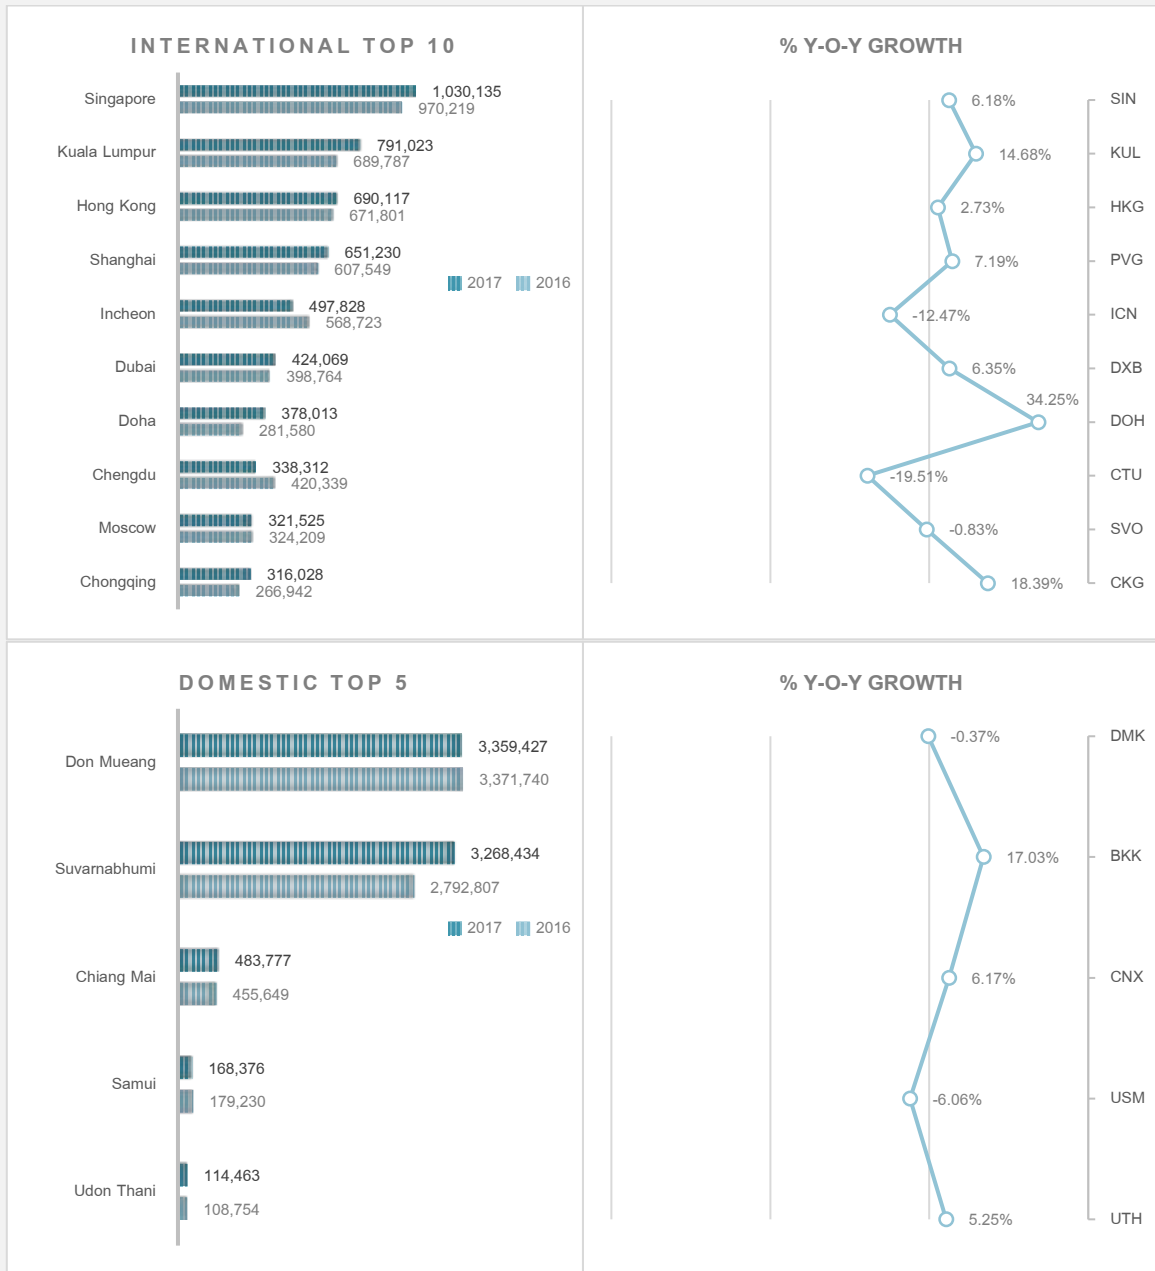

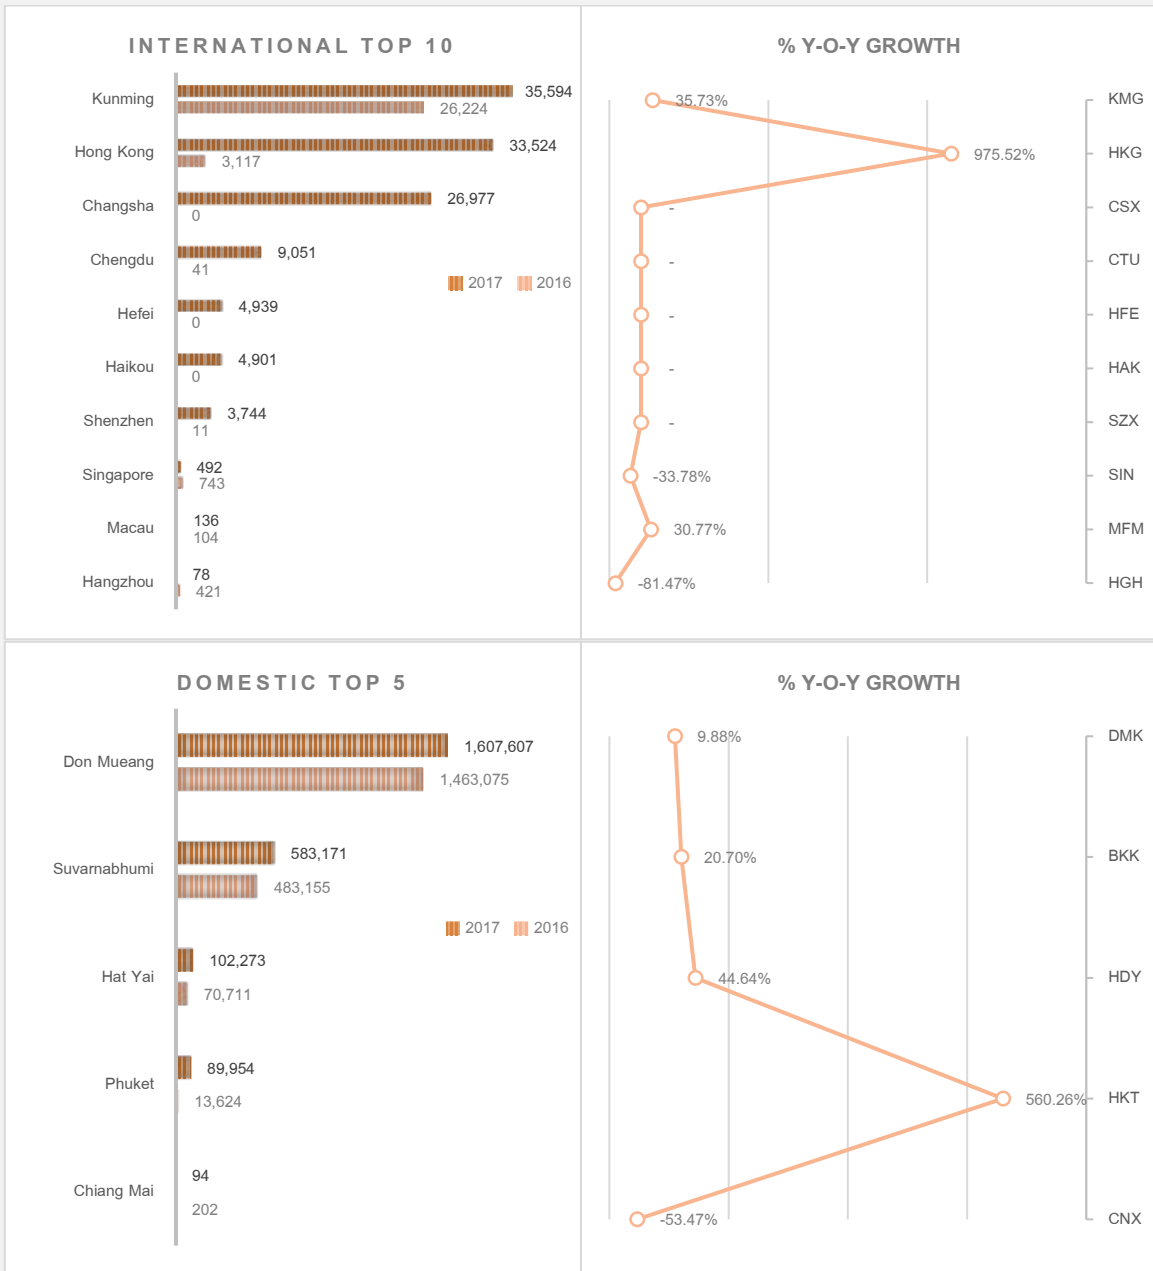

Chart 35: Chiang Rai International Airport's top cities-paired by number of passengers

2.5 Airlines Alliance Traffic at Suvarnabhumi Airport

In 2017, 110 airlines provided international scheduled services at Suvarnabhumi Airport, with 49.17 million of international passengers. This number of passengers was accounted for 99% of total international passengers. Out of those passengers who travelled with scheduled services, 44.19% travelled with Star Alliance airlines, while Sky Team and Oneworld accommodated 13.09% and 11.66% of international passengers.

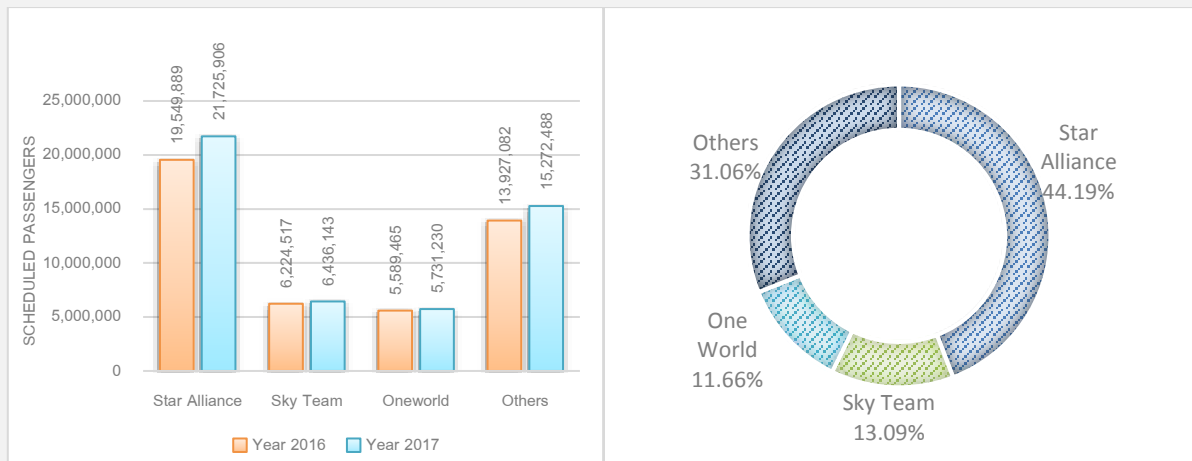

Star Alliance consisted of 27 airlines but only 14 members provided scheduled services at Suvarnabhumi Airport, including Air China, Air India, All Nippon Airways, Asiana Airlines, Austrian Airlines, Egypt Air, Ethiopian Airlines, EVA Air, Lufthansa, Shenzhen Airlines, Singapore Airlines, Swiss International Airlines, Thai Airways

International and Turkish Airlines. Thai Airways International gained highest amount of passengers by 1.72 million from last year.

Sky Team consisted of 21 members with 13 of those provided scheduled services to Suvarnabhumi Airport, including Aeroflot, Air France, China Airlines, China Eastern Airlines, Shanghai Airlines, China Southern Airlines, Delta Air, Garuda Indonesia, Kenya Airways, KLM, Korean Air, Vietnam Airlines and Xiamen Airlines.

Ten airlines from Oneworld, including British Airways, Cathay Pacific Airways, Finnair, Japan Airlines, Malaysia Airlines, Qantas Airways, Qatar Airways, Royal Jordanian, Siberia Airlines and Srilankan Airlines.

Chart 36: Classification of international scheduled passenger by alliance airlines

Remark: These figures calculated from the number of passengers carried by designated airlines mention above, excluding passengers from code-sharing with non-members or other affiliate members.

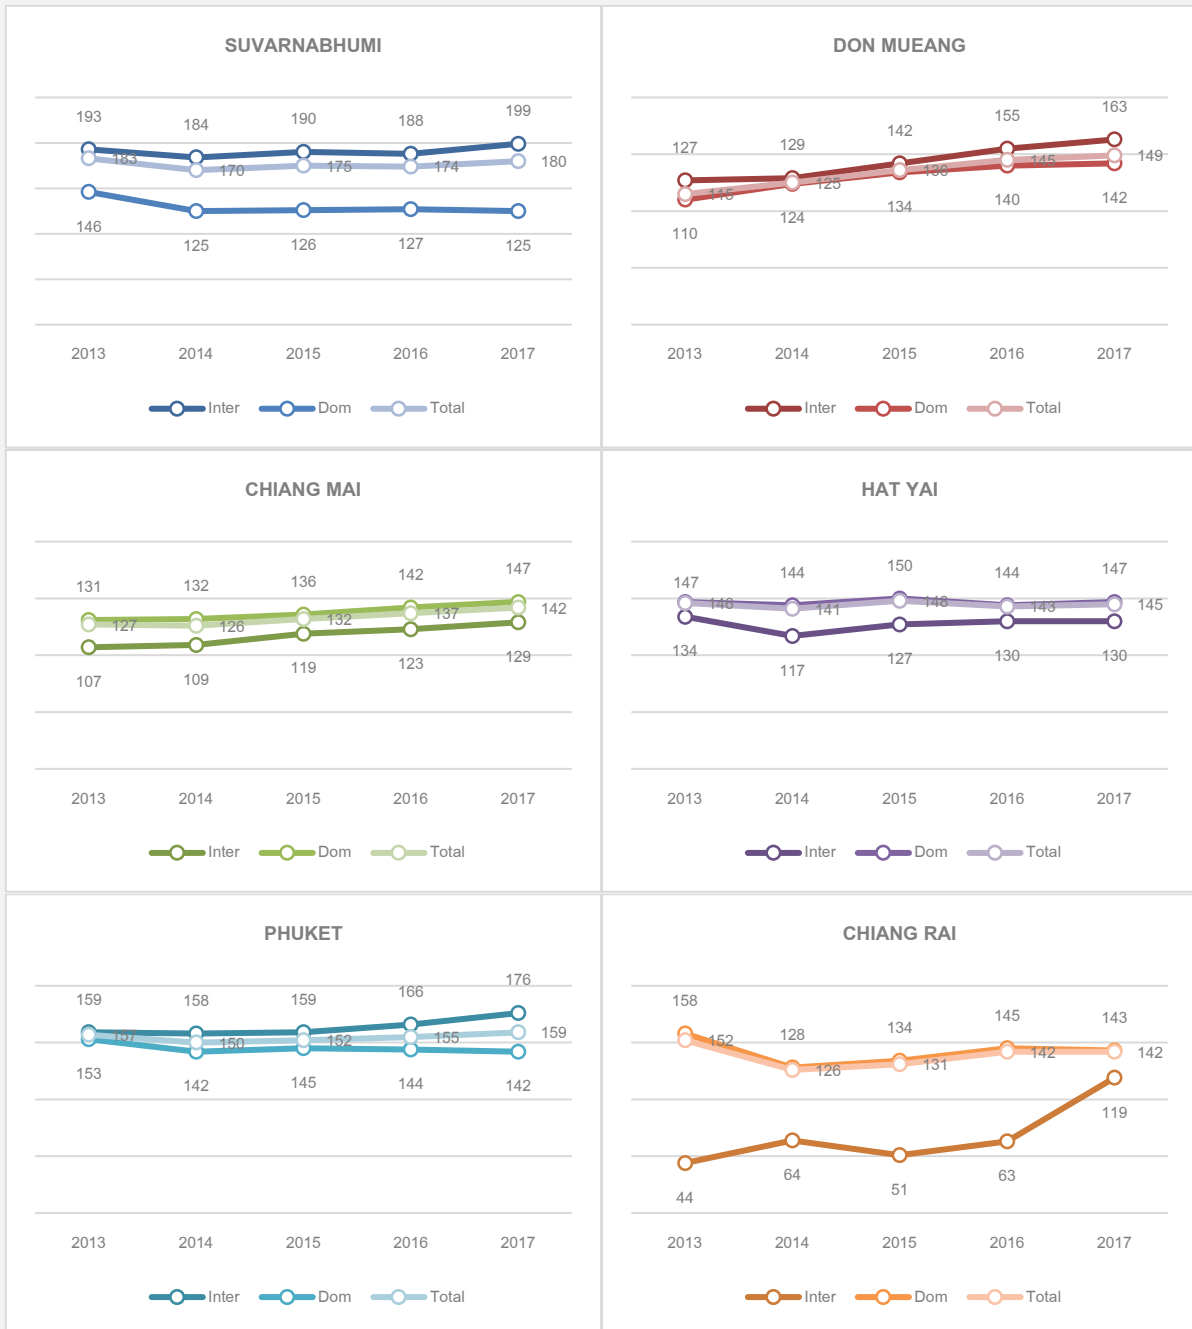

2.6 Passengers per Aircraft

The number of passengers per aircraft illustrated the average number of passengers per flight (excluding all-cargo flights).

The growth of China market and low cost carriers helped the number of passengers to increase and

hence increased the number of passengers per aircraft for both international and domestic operations, especially in regional airports such as Chiang Rai where international passengers per aircraft significantly boosted from previous years by international airlines from China.

Chart 37: Passengers per aircraft

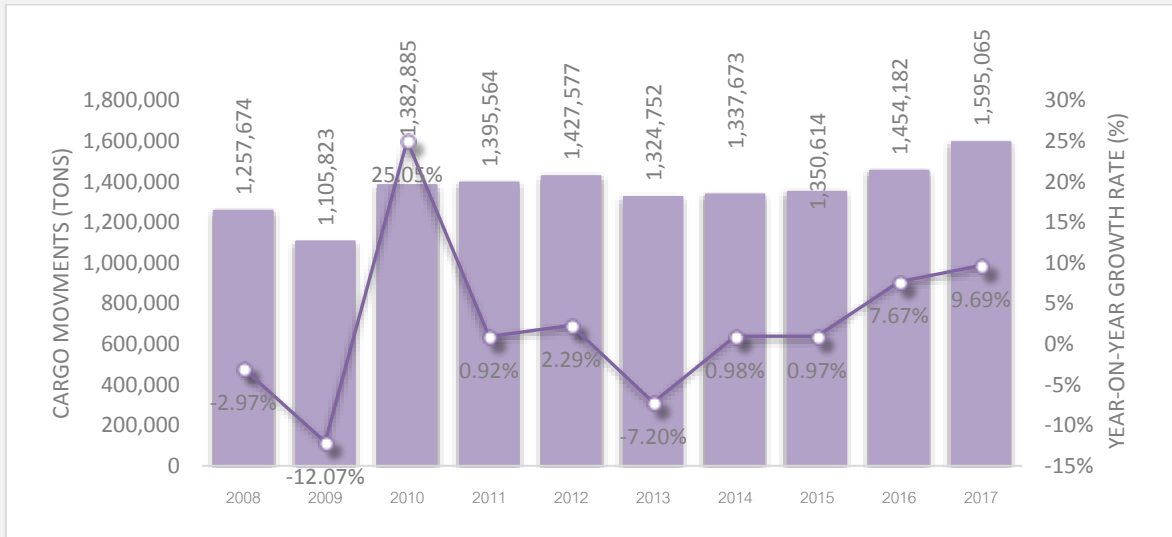

3. Commercial Freight and Mail Throughput

In 2017, Air cargo experienced the 9.68% growth. The international air cargo depended on trading partners' economies which continued to show improvement from past years. Overall air cargo

handled by AOT's 6 airports reported an amount of 1.59 million tons, a 2.68% compound average annual growth from 2008-2017. cargos. (see chart 38)

Chart 38: AOT's commercial freight and mail services in tons 2008-2017

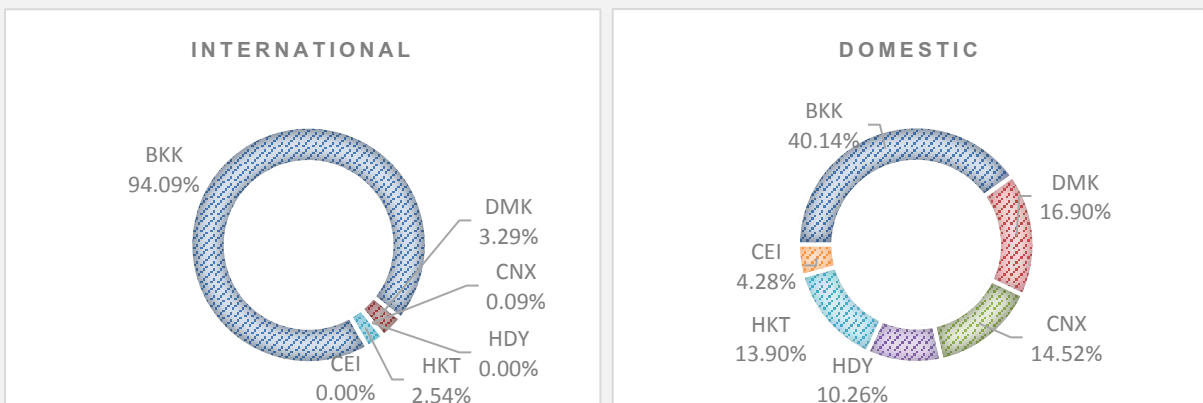

3.1 Air Cargo Proportion between AOT's Airports

AOT's airport accommodated 1.48 million tons of international air cargo, with 11.26% increased, while the domestic air cargo volume reported 0.11 million tons with -7.53% decreased. The proportion between international and domestic movements were 93 to 7.

Out of those numbers, 94.09% and 40.14% of international and domestic air cargos were accommodated by Suvarnabhumi Airport. (see chart 39)

Chart 39: AOT's commercial freight and mail services proportions

3.2 Airlines Performance by Volume of Air Cargo

International air cargo of Thailand continued its positive-growth track as global trade recovered from stagnate. Most airlines reported the increasing volume of both international and domestic air cargo.

In 2017, Thai Airways International gained volume of international air cargo at Suvarnabhumi but lost in Chiang Mai and Phuket. Bangkok Airways also gained more volume of both international and domestic air cargo, while most low cost airlines lost domestic cargo volume. (see Chart 40-45)

Chart 40: Suvarnabhumi Airport's top airlines by volume of air cargo (unit in tons)

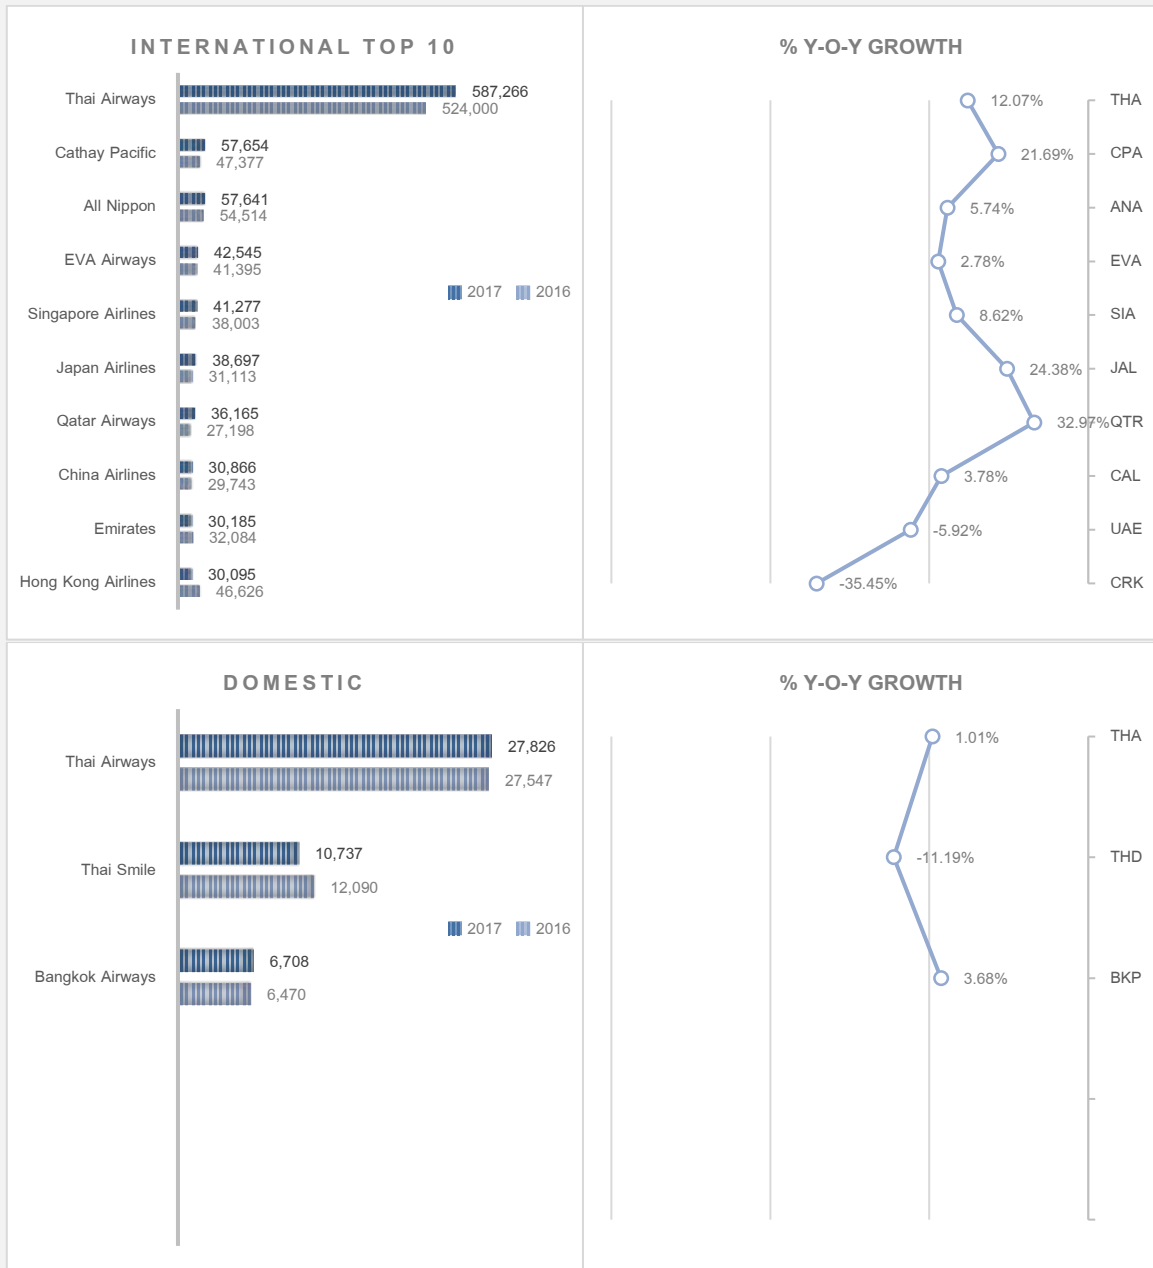

Chart 41: Don Mueang International Airport's top airlines by volume of air cargo (unit in tons)

Chart 44: Phuket International Airport's top airlines by volume of air cargo (unit in tons)

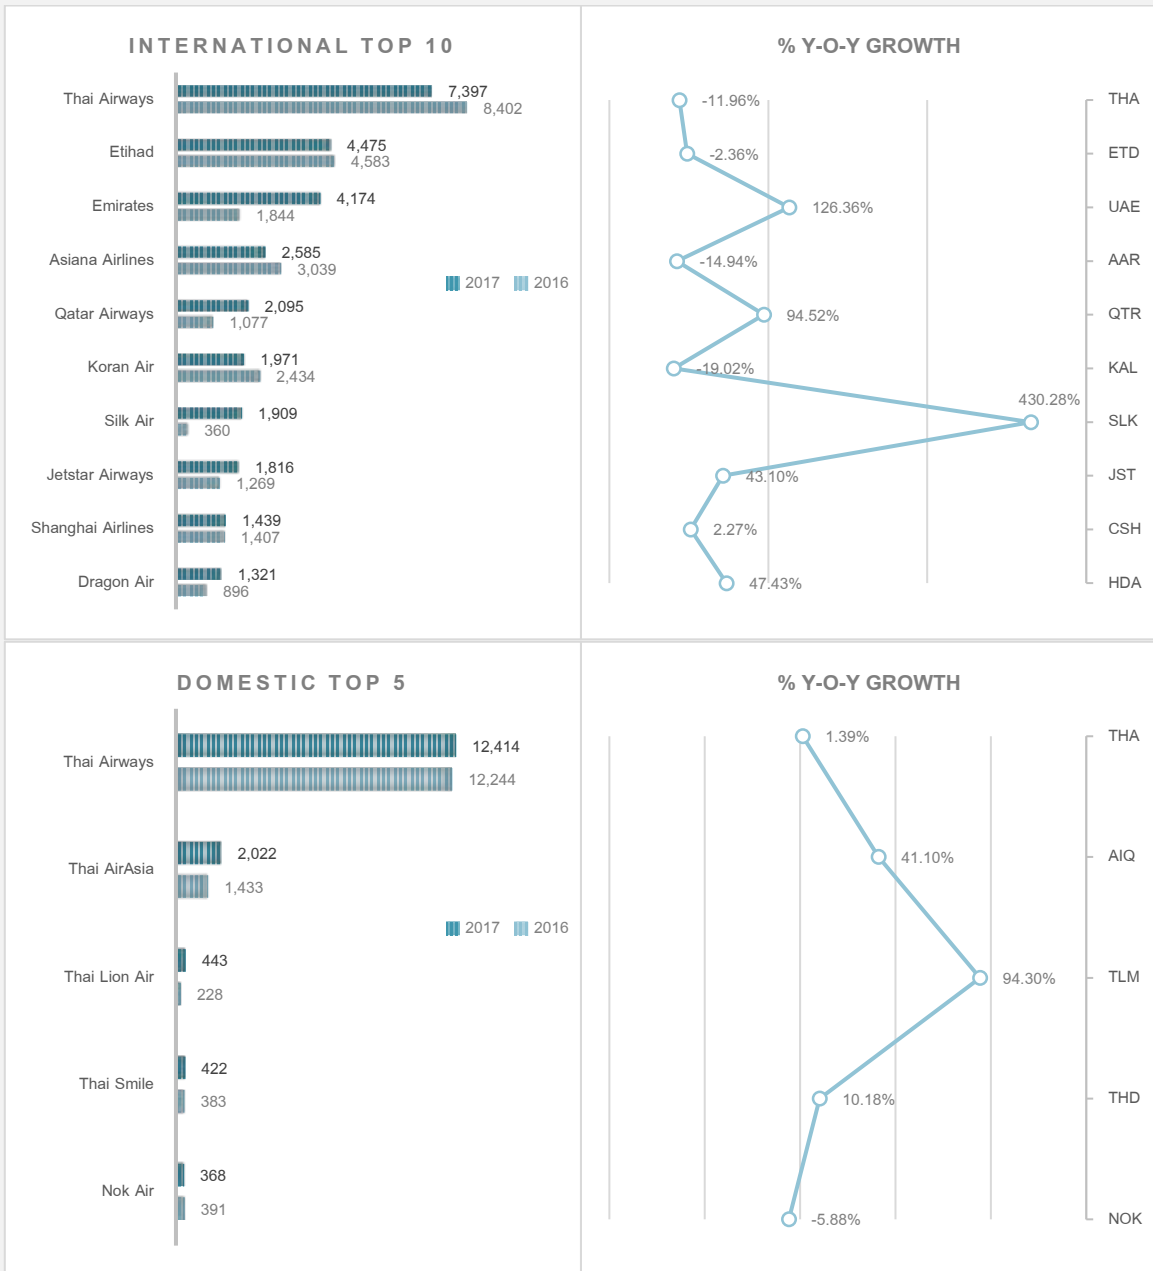

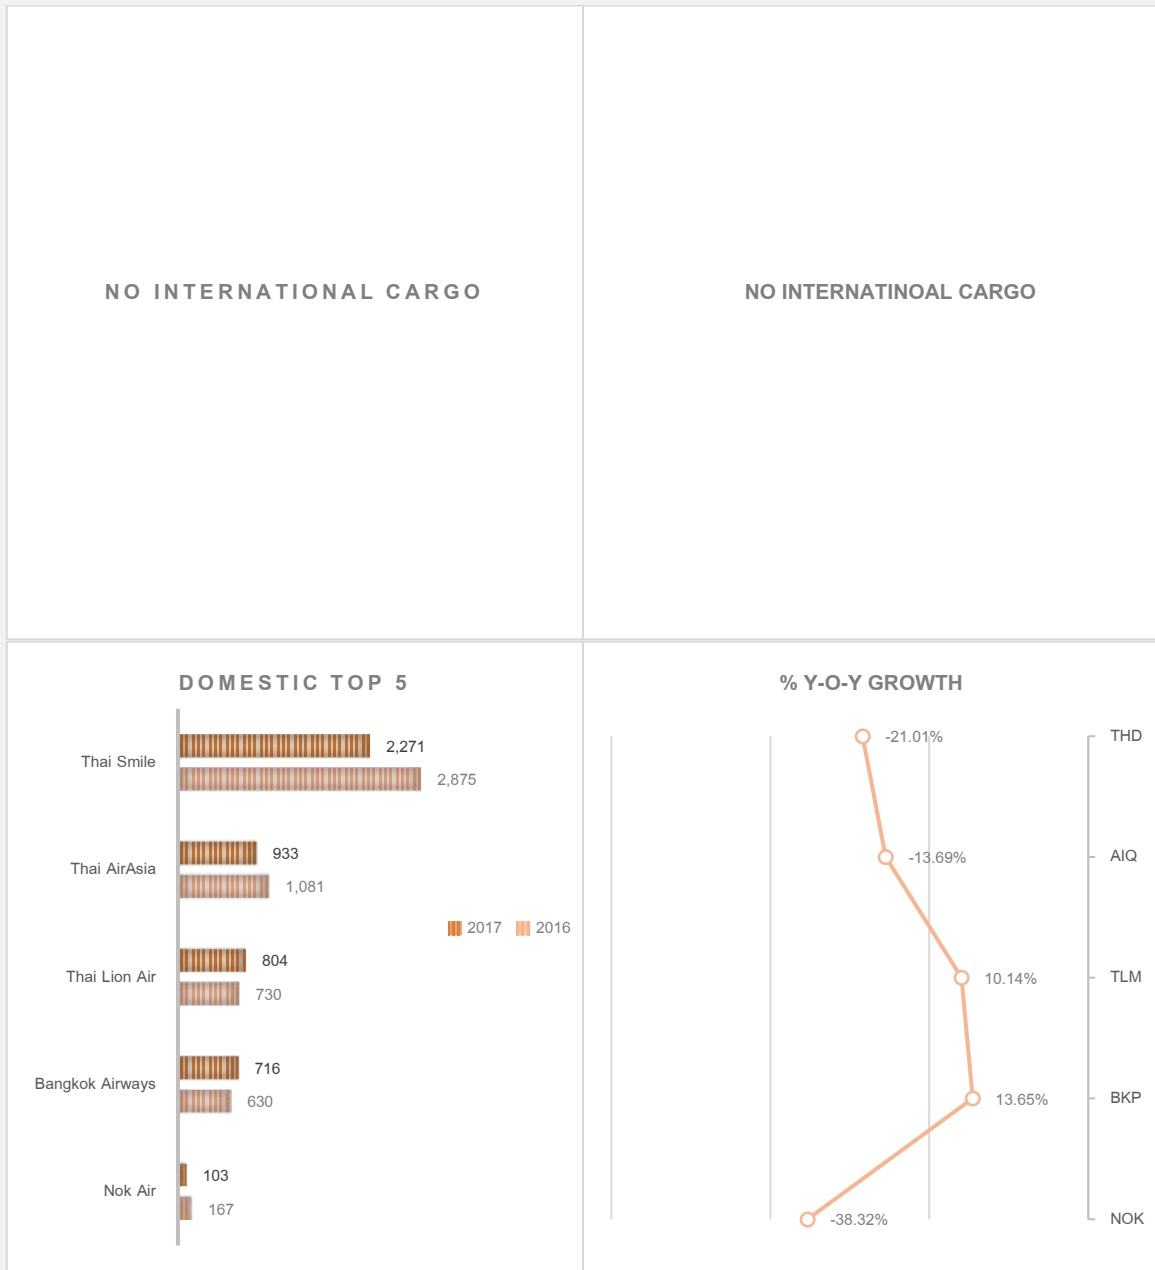

Chart 45: Chiang Rai International Airport's top airlines by volume of air cargo (unit in tons)

3.3 Routes Traffic by Volume of Air Cargo

The routes traffic ranked the airport by volume of air cargos (including freight and mail, without transit), regardless of type of flight operations.

Air cargo went the same direction as passenger flight, top-rank international cities-paired was within Asia-Pacific, while domestic cargo shipment between both Bangkok airports and regional airports within Thailand. (see Chart 46-51)

Chart 46: Suvarnabhumi Airport's top cities-paired by volume of air cargo (unit in tons)

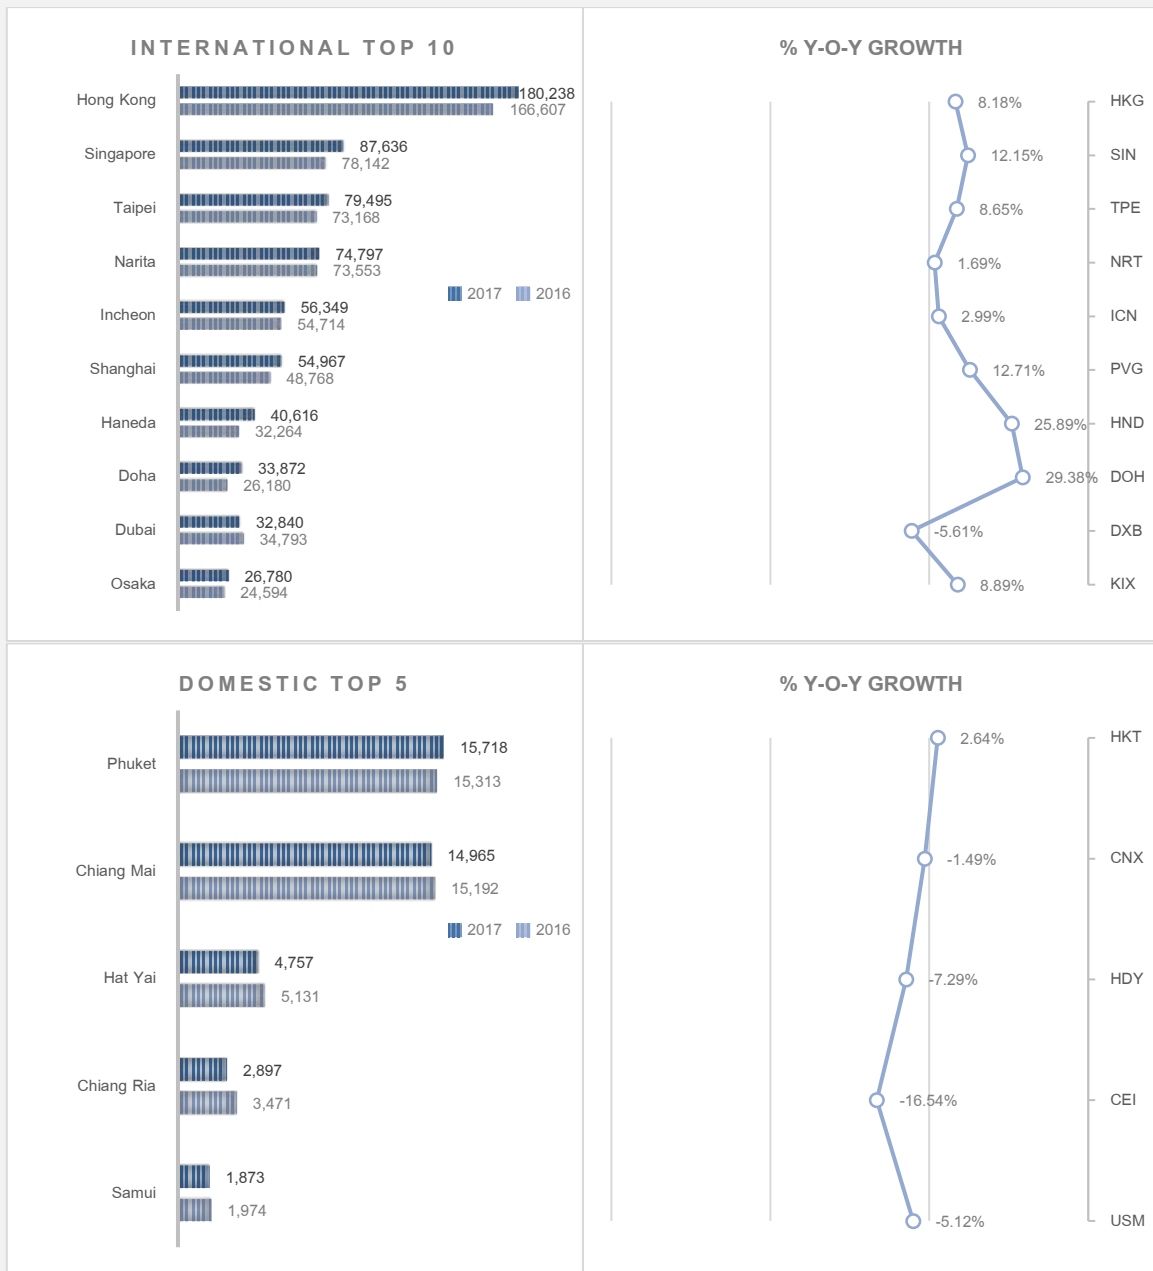

Chart 47: Don Mueang International Airport's top cities-paired by volume of air cargo (unit in tons)

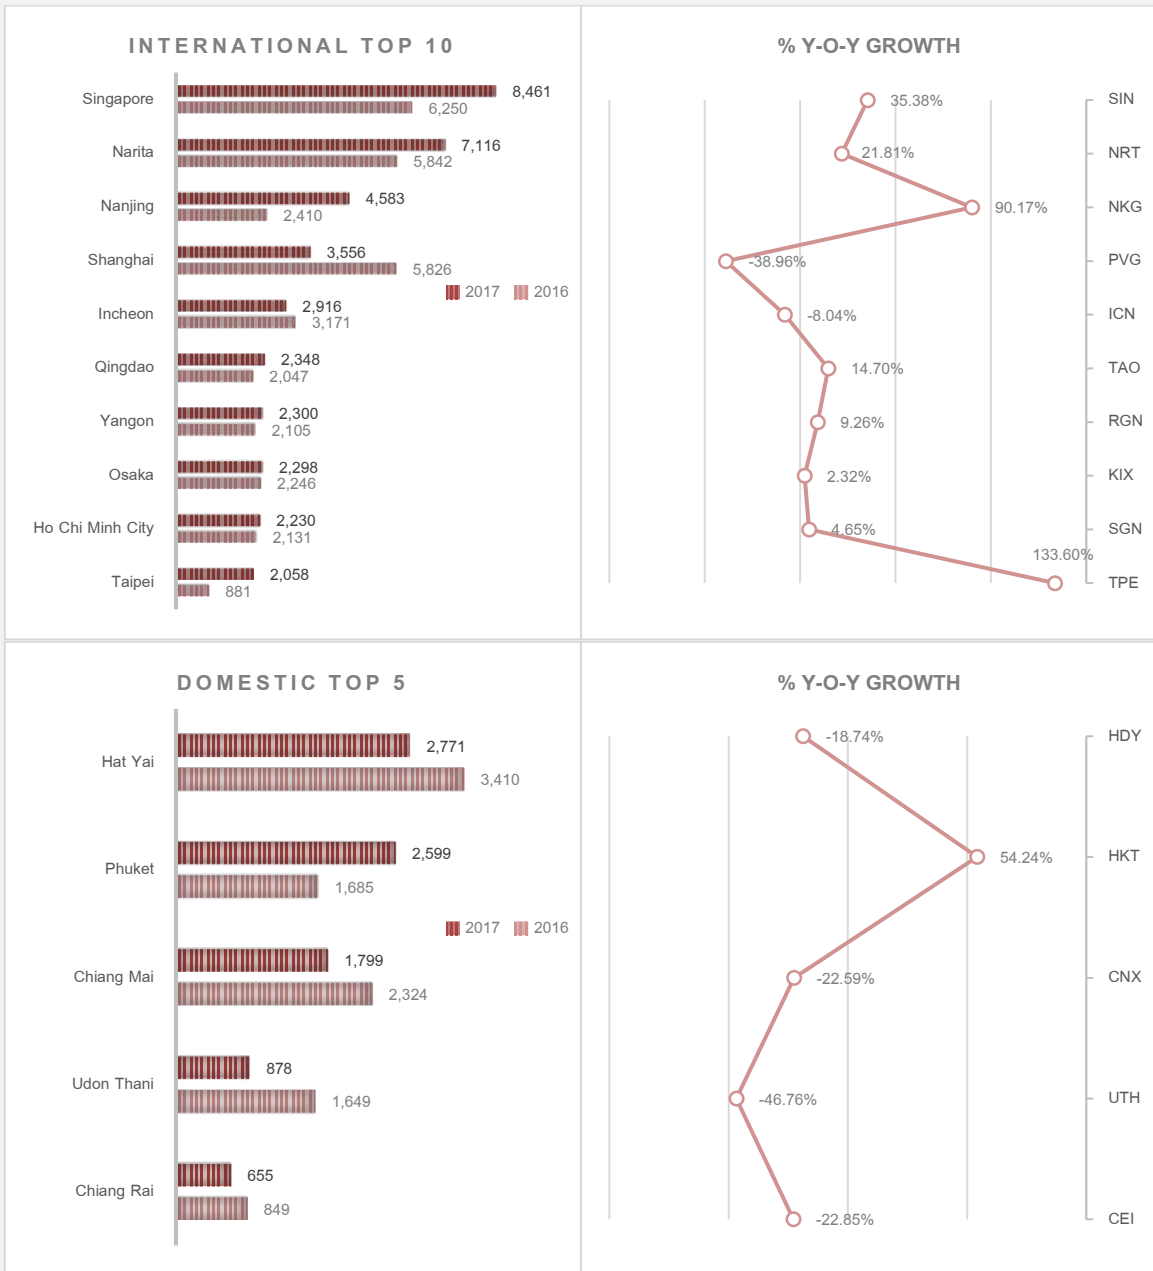

Chart 48: Chiang Mai International Airport's top cities-paired by volume of air cargo (unit in tons)

Chart 50: Phuket International Airport's top cities-paired by volume of air cargo (unit in tons)

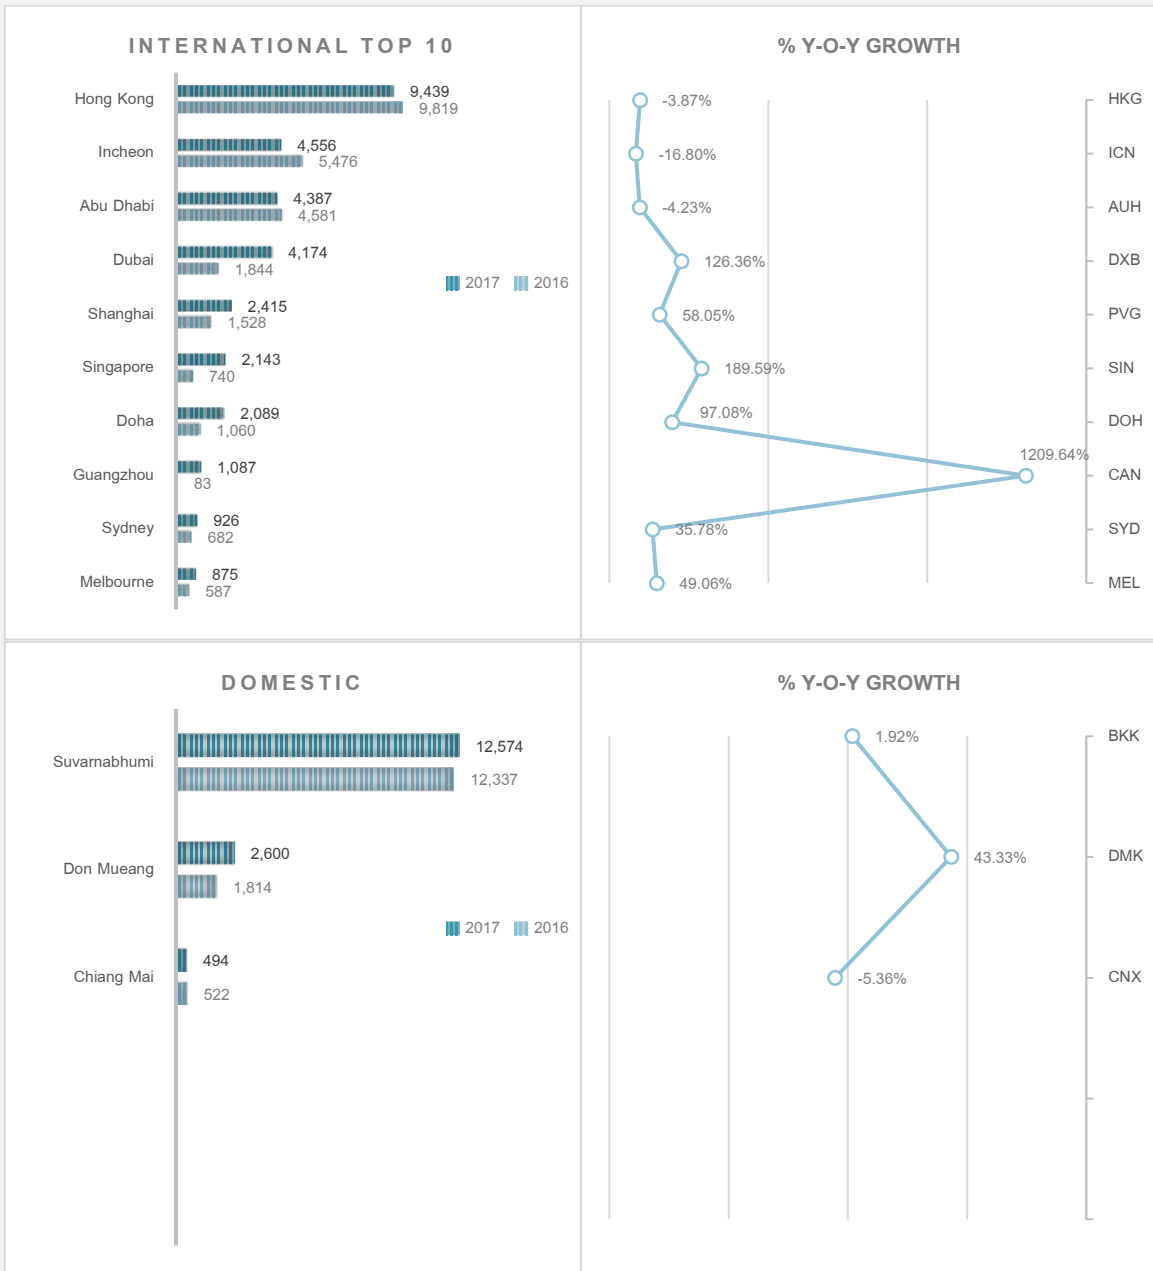

Chart 51: Chiang Rai International Airport's top cities-paired by volume of air cargo (unit in tons)

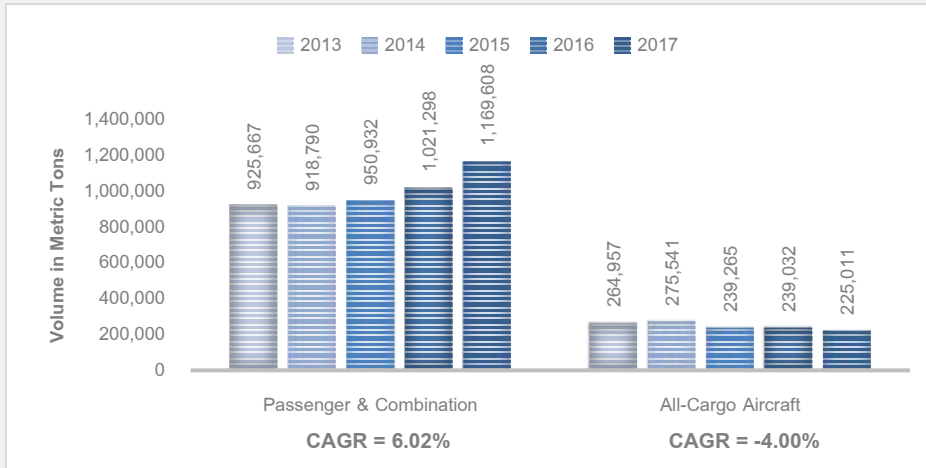

3.4 International Air Cargo at Suvarnabhumi Airport

International air cargo volumes at Suvarnabhumi Airport increased by 10.66% from the previous year. Shipment volumes of freight and mail carried along with passenger and combination aircrafts grew by 14.52% , with compound average growth

rate for 2013-2017 of 6.02% . However, cargo volume carried by freighter slightly dropped by 5.87% , with compound average growth rate for 2013-2017 of -4.00% (see Chart 52)

Chart 52: Suvarnabhumi Airport’s international air cargo volume

The proportion between air cargo carried by passenger & combinations and freighters were 84:16, slightly changed from 81:19 of previous year. The different figures caused by lower number of shipment of freighters such as Hong Kong Airlines, Asiana Airlines, Korean Airlines, Aerologic, EVA Airways and All Nippon Airways, while the cargo carried by passenger & combination airlines slightly increased. (see Chart 53)

At Suvarnabhumi Airport, Nippon Cargo Airlines became the all-cargo operator with the highest freight & mail volume, with 25,150 metric tons, followed by All Air Hong Kong and All Nippon Airways. Raya Airways and Malaysia Airlines were the fastest growing operator in last year. (see Chart 54)

Chart 53: Suvarnabhumi Airport’s commercial air cargo proportion

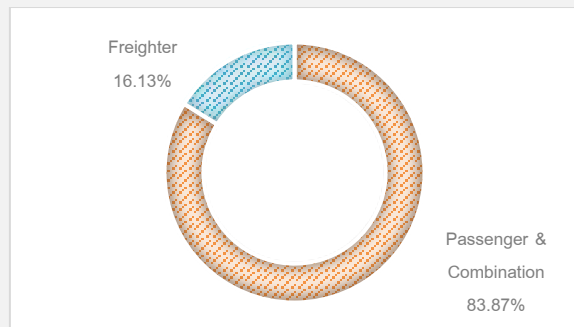

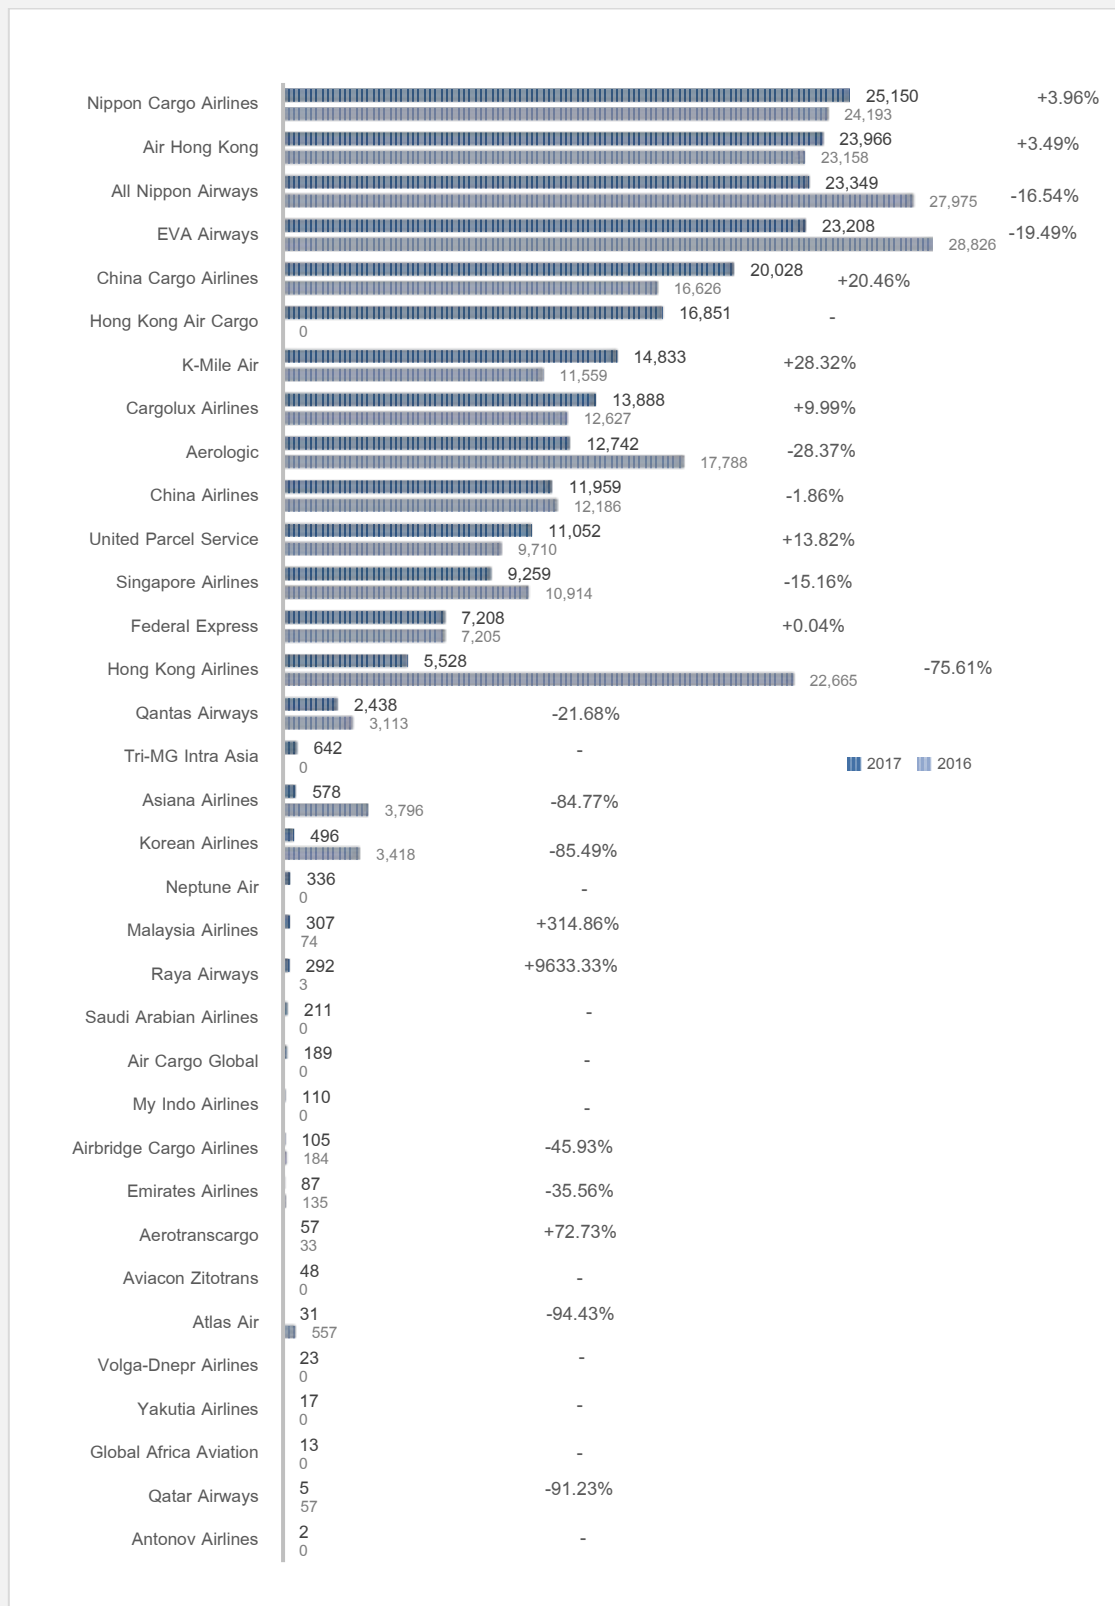

Chart 54: International cargo volume by airlines (all-cargo flight only) at Suvarnabhumi Airport

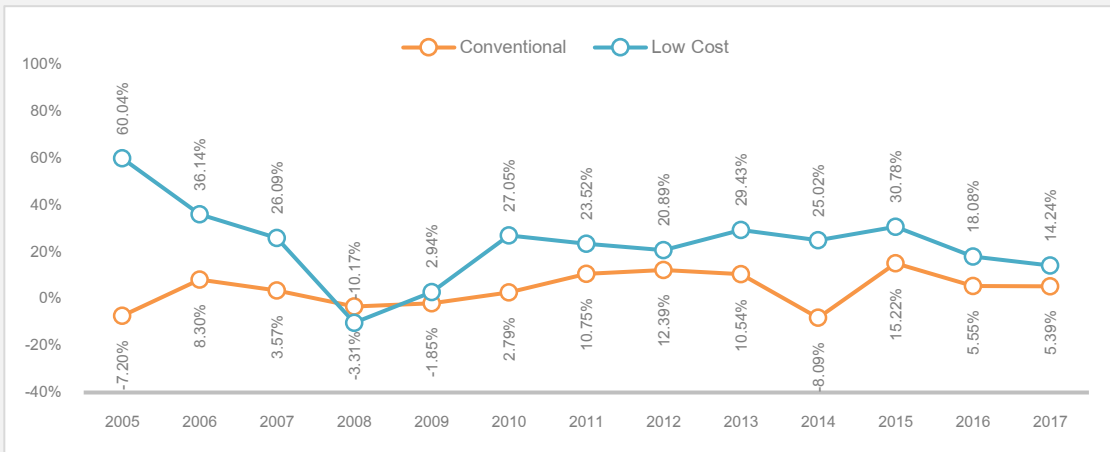

4. Low Cost Carriers

4.1 Development of Low Cost Airlines in Thailand

Low cost airlines first introduced its services in Thailand in December 2003. While many low cost airlines appeared in the market, some still operates and many had gone. Major low cost airlines such as Thai AirAsia, Nok Air and Thai Lion Air are operating and expanding their fleet, which

significantly boosted air traffic within Thailand. This can be seen from the number of passengers, for almost a decade, the growth of low cost airlines' passengers was greater than conventional airlines. (see Chart 55)

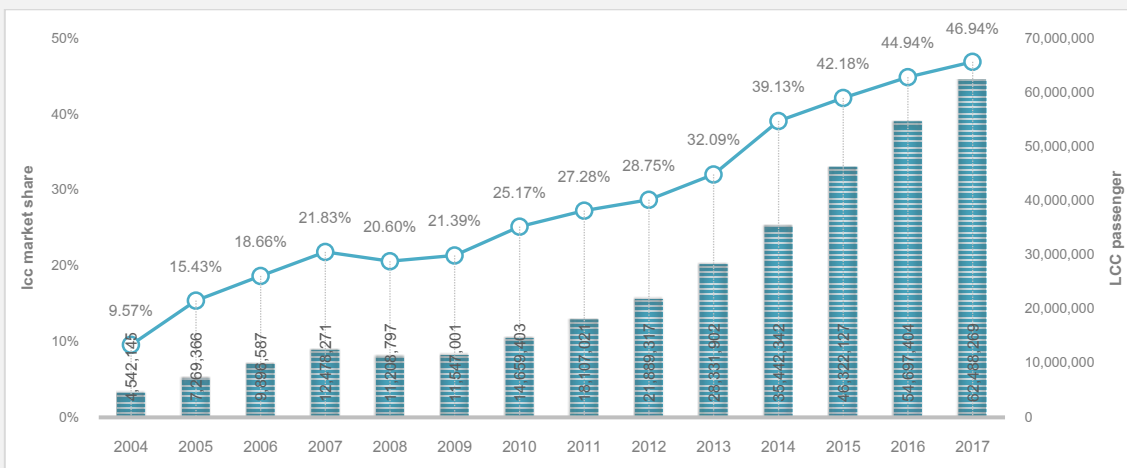

Chart 55: The development of Low Cost Carriers (measured of passenger growth rate)

Passengers traveled by LCC airlines started with less than 0.08 million in 2003 and 4.54 million in 2004, then rose significantly to 62.49 million in 2017. Low cost airlines currently held 46.94% of

passenger market share. The drastic increased took place since 2012 which passengers highly gained by 40 million, while it took about a decade to reach the first 20 million passengers. (see Chart 56)

Chart 56: The development of LCC passengers and market share at AOT airports

4.2 LCCs Air Traffic Overview

Low cost airlines expanded their traffic significantly. By the end of 2017, AOT's 6 airports accommodated 62,488,269 passengers who travelled by low cost airline with 401,829 flights. These numbers of passenger and aircraft movement represent market shares of 46.9 and 48.2 percent among overall AOT traffic.

Peach Aviation (BKK), China Express (DMK) and Kunming Airlines (HDY) had commenced their scheduled services in 2017, while Scoot merged with Tiger Air in July 2017 and operated using Scoot brand at DMK, whereas Orient Thai Airlines (BKK and DMK) has suspended its scheduled services in 2016.

4.3 List of LCCs by Number of Passengers

Many local LCCs have changed their business strategies from domestic orientation toward international orientation. This was because the limited number of available slots especially at DMK, and

the saturation of domestic market as well. Hence, the number of international passengers increased. See table 59-64 for details of low cost airlines by number of passengers for each airport in 2017

Chart 59: LCC's market share by passengers at Suvarnabhumi Airport

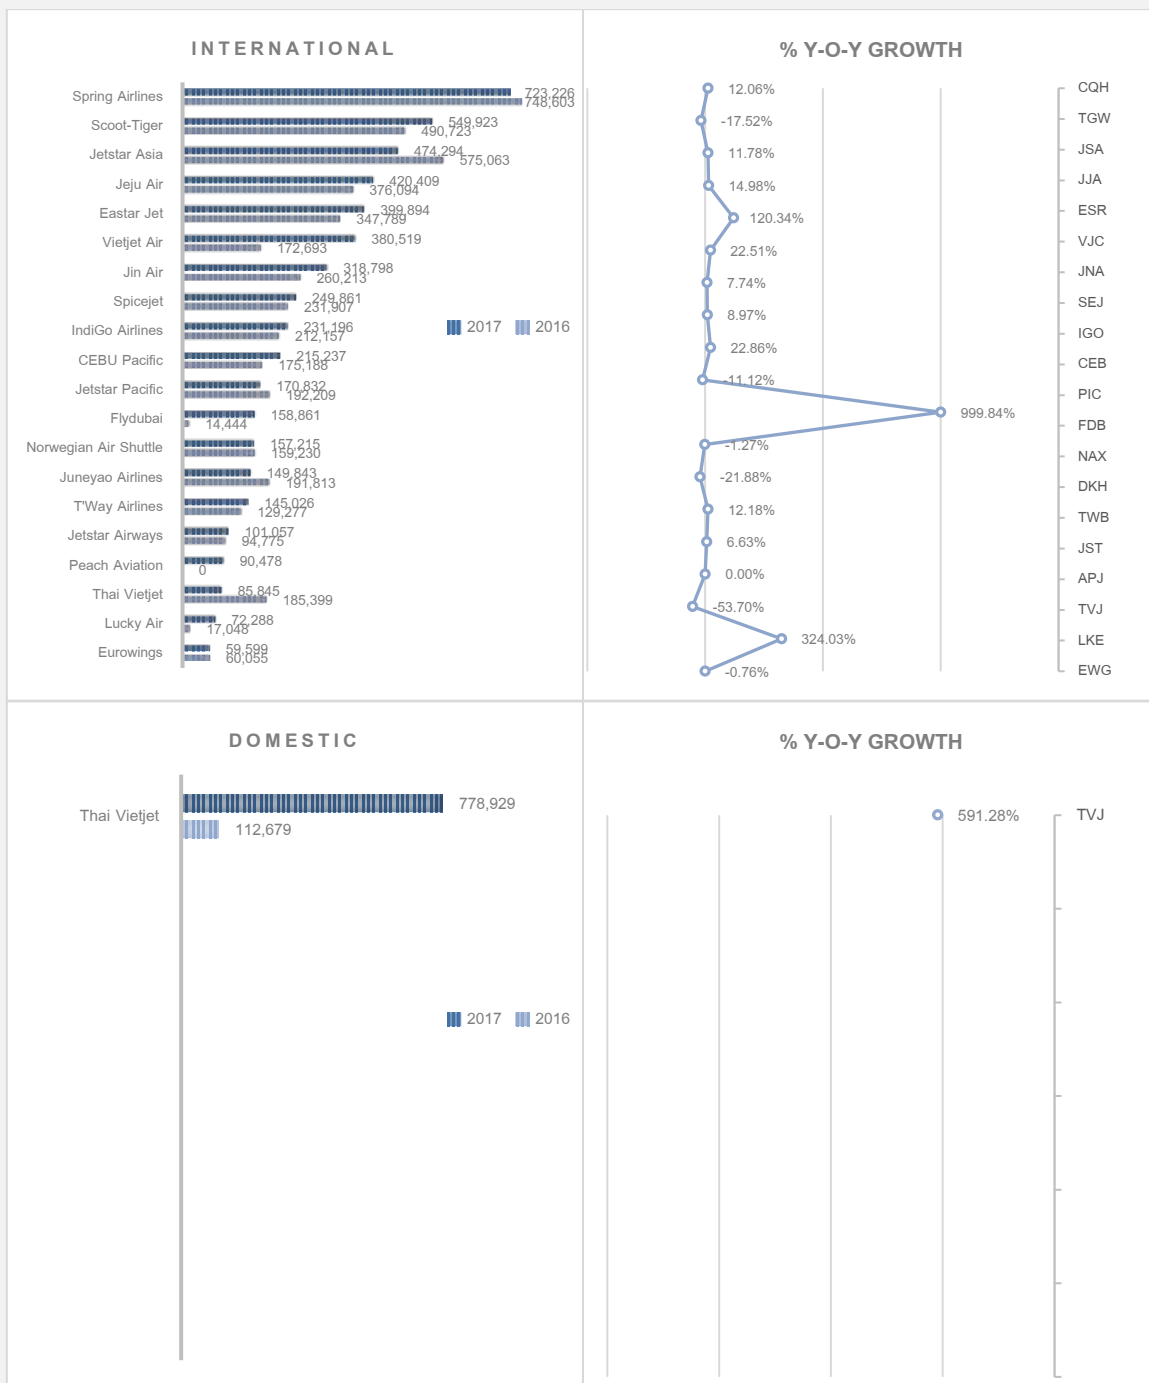

Chart 60: LCC's market share by passengers at Don Mueang International Airport

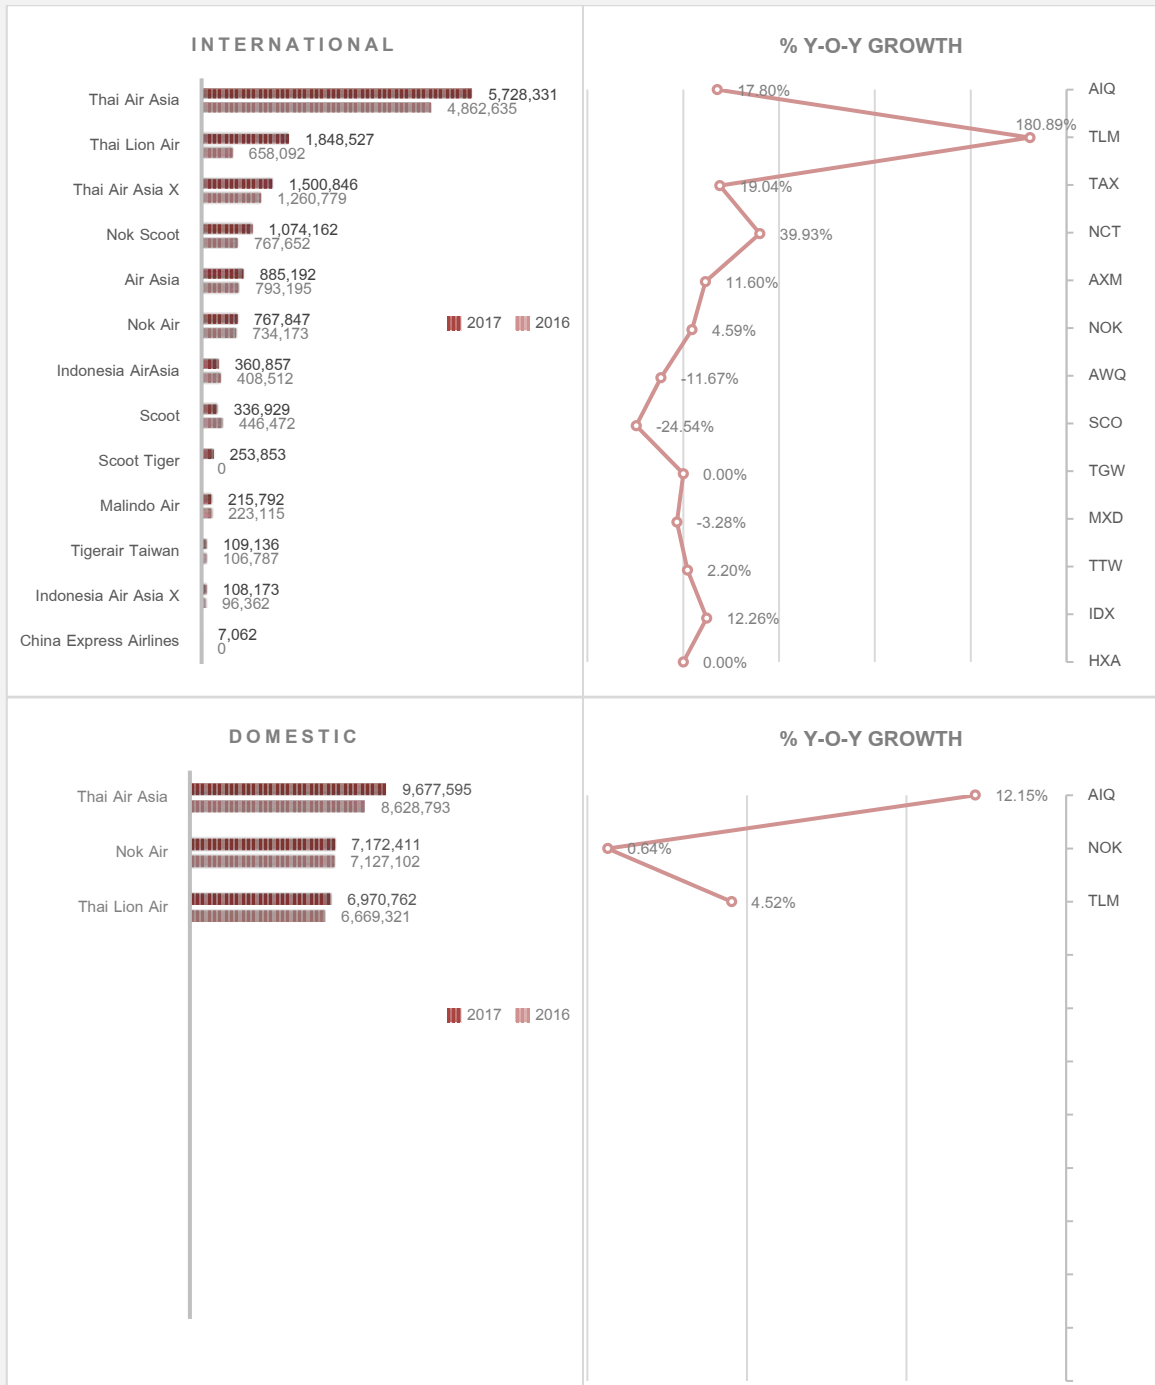

Chart 61: LCC's market share by passengers at Chiang Mai International Airport

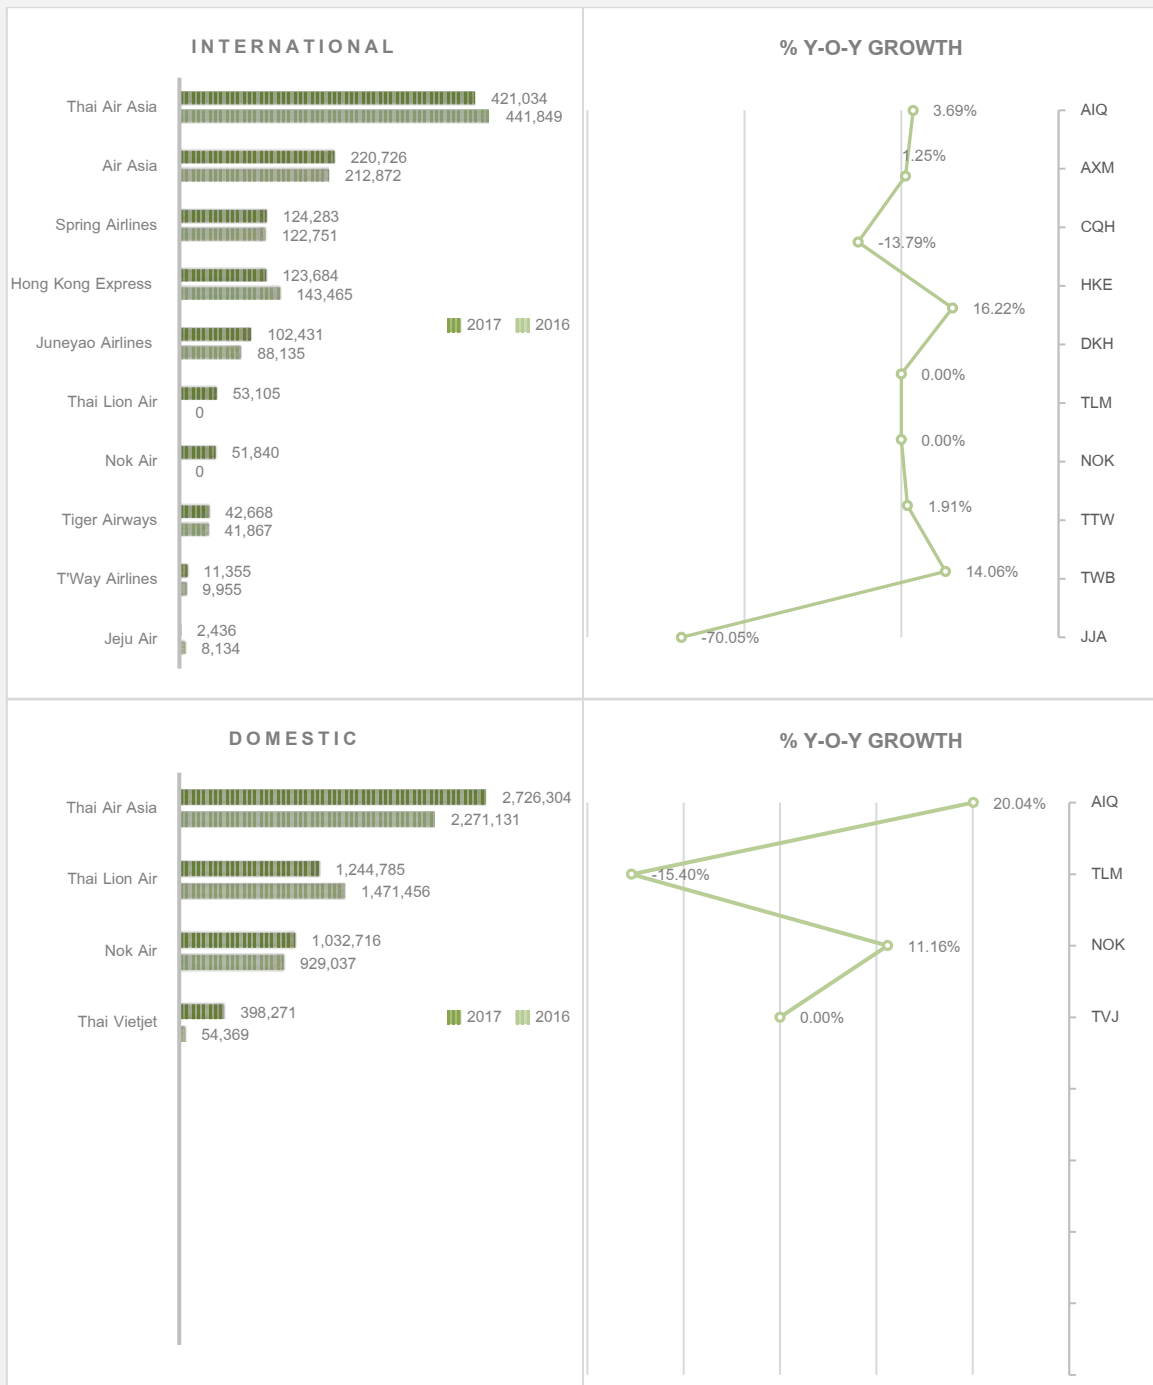

Chart 62: LCC's market share by passengers at Hat Yai International Airport

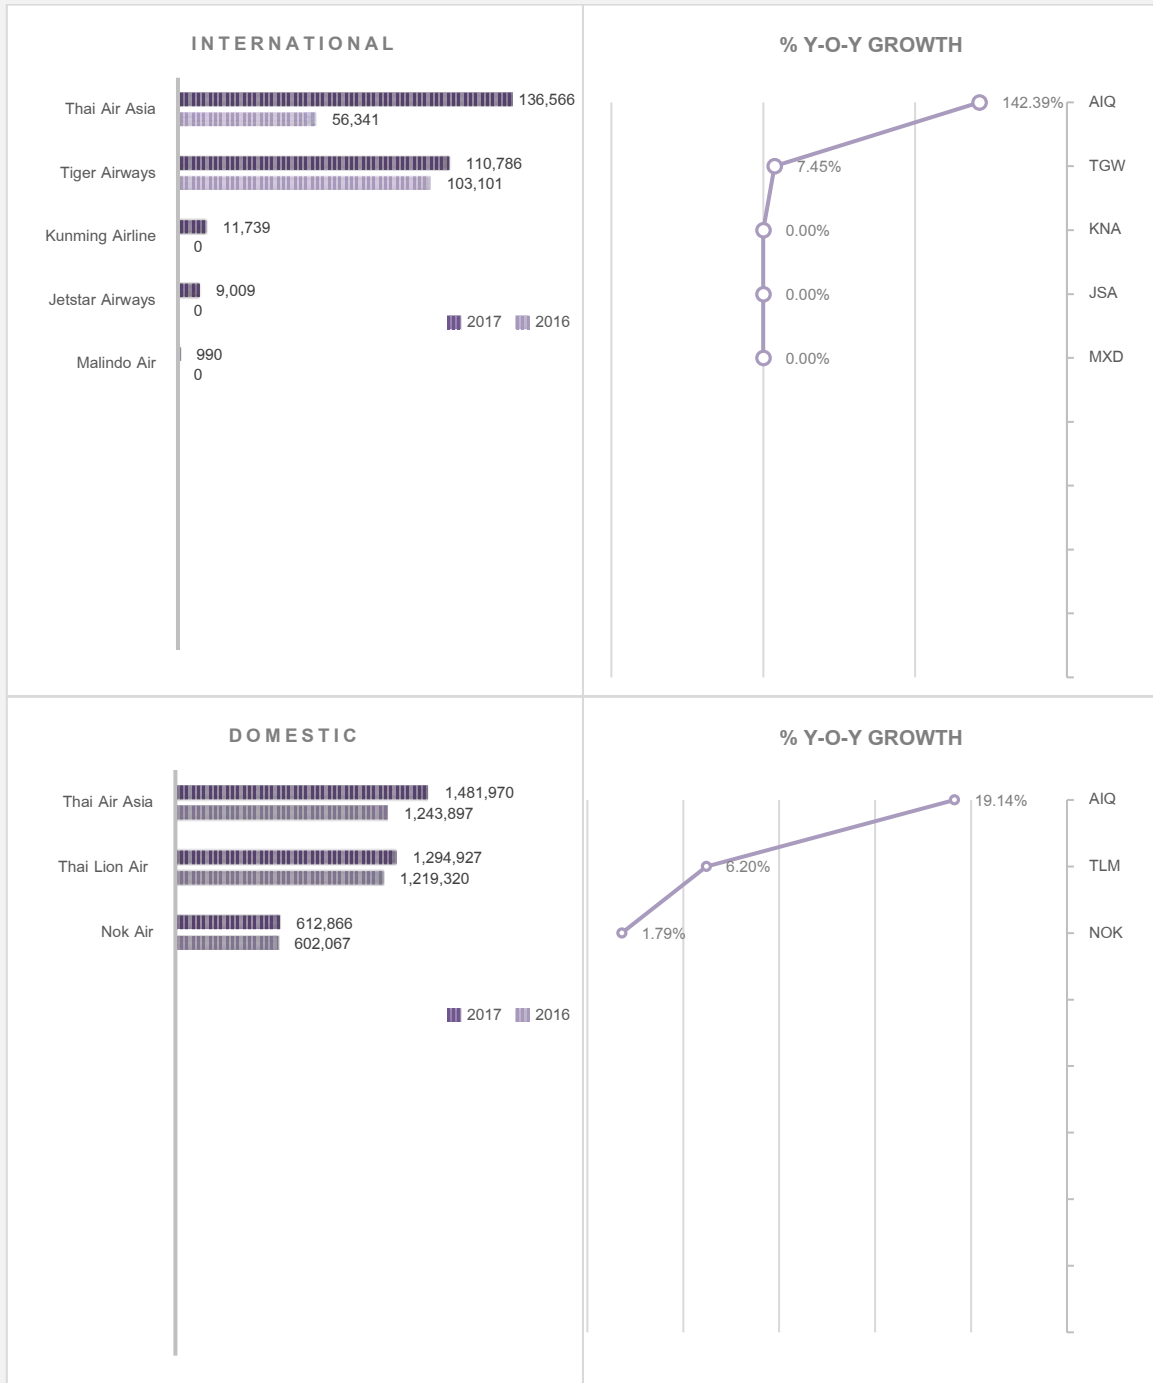

Chart 63: LCC's market share by passengers at Phuket International Airport

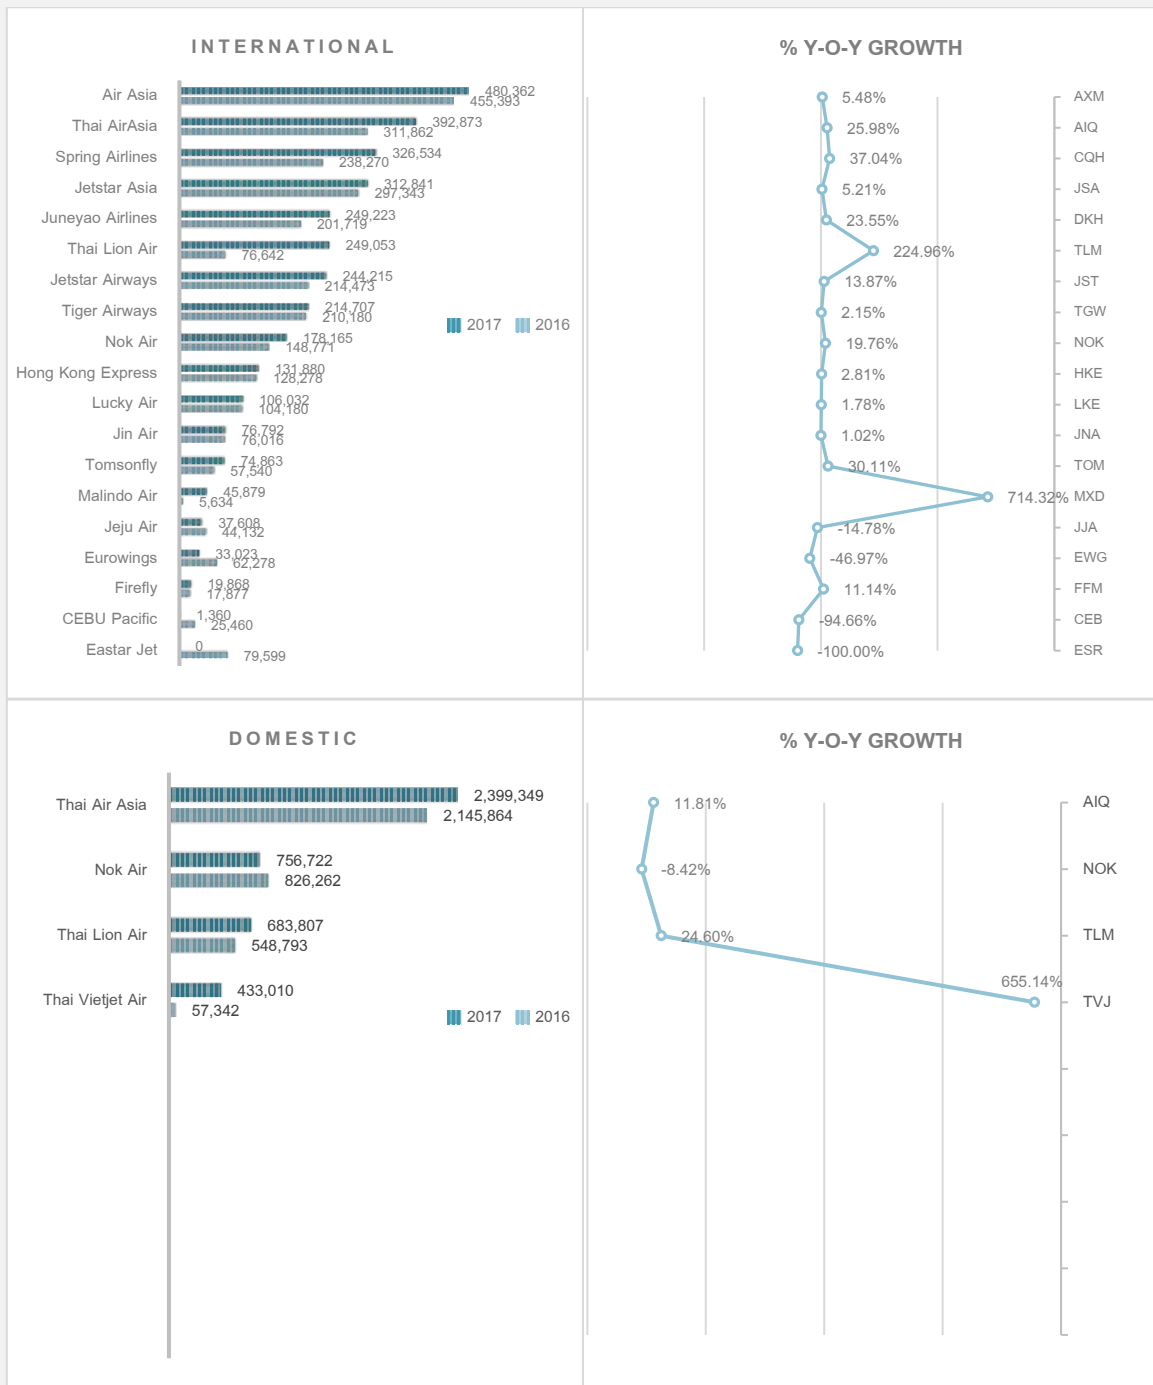

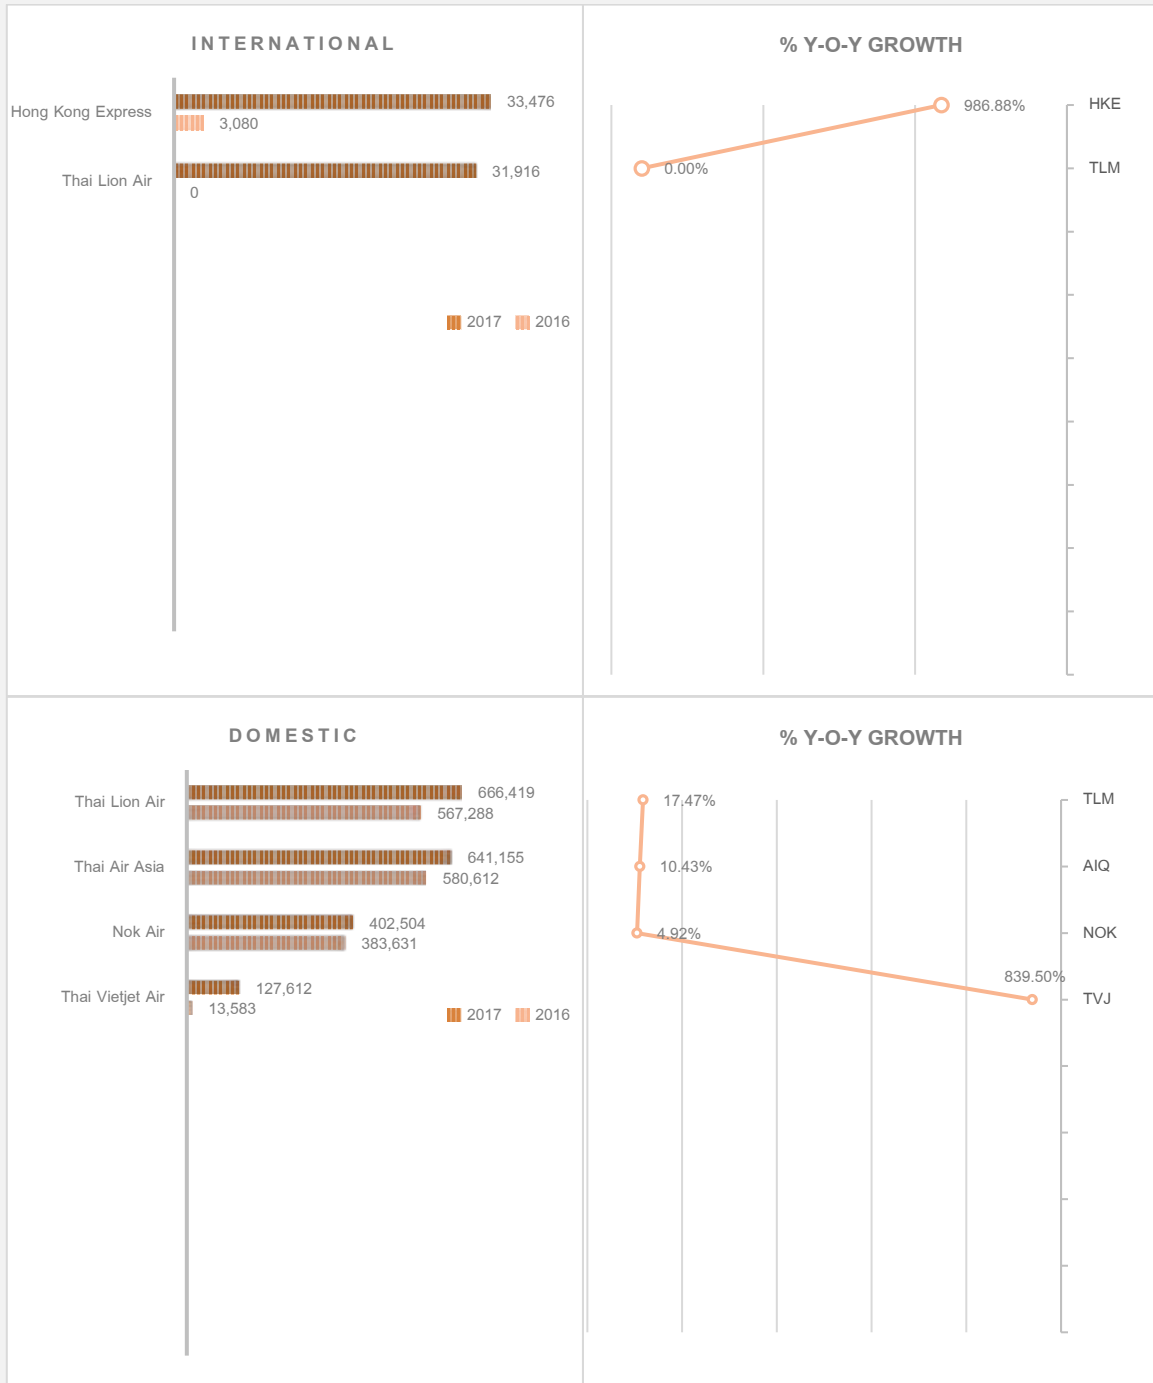

Chart 64: LCC's market share by passengers at Mae-Fah Luang Chiang Rai Internatinal Airport

4.4 Top Airports by LCCs' Passengers

Chart 65-70 showed top airports by number of international and domestic LCCs' passengers in 2017 and percent growth compared with the

previous year. These numbers included only passengers who travelled with scheduled services and no transit passenger involved.

Chart 65: Top airports by LCCs' passengers at Suvarnabhumi Airport

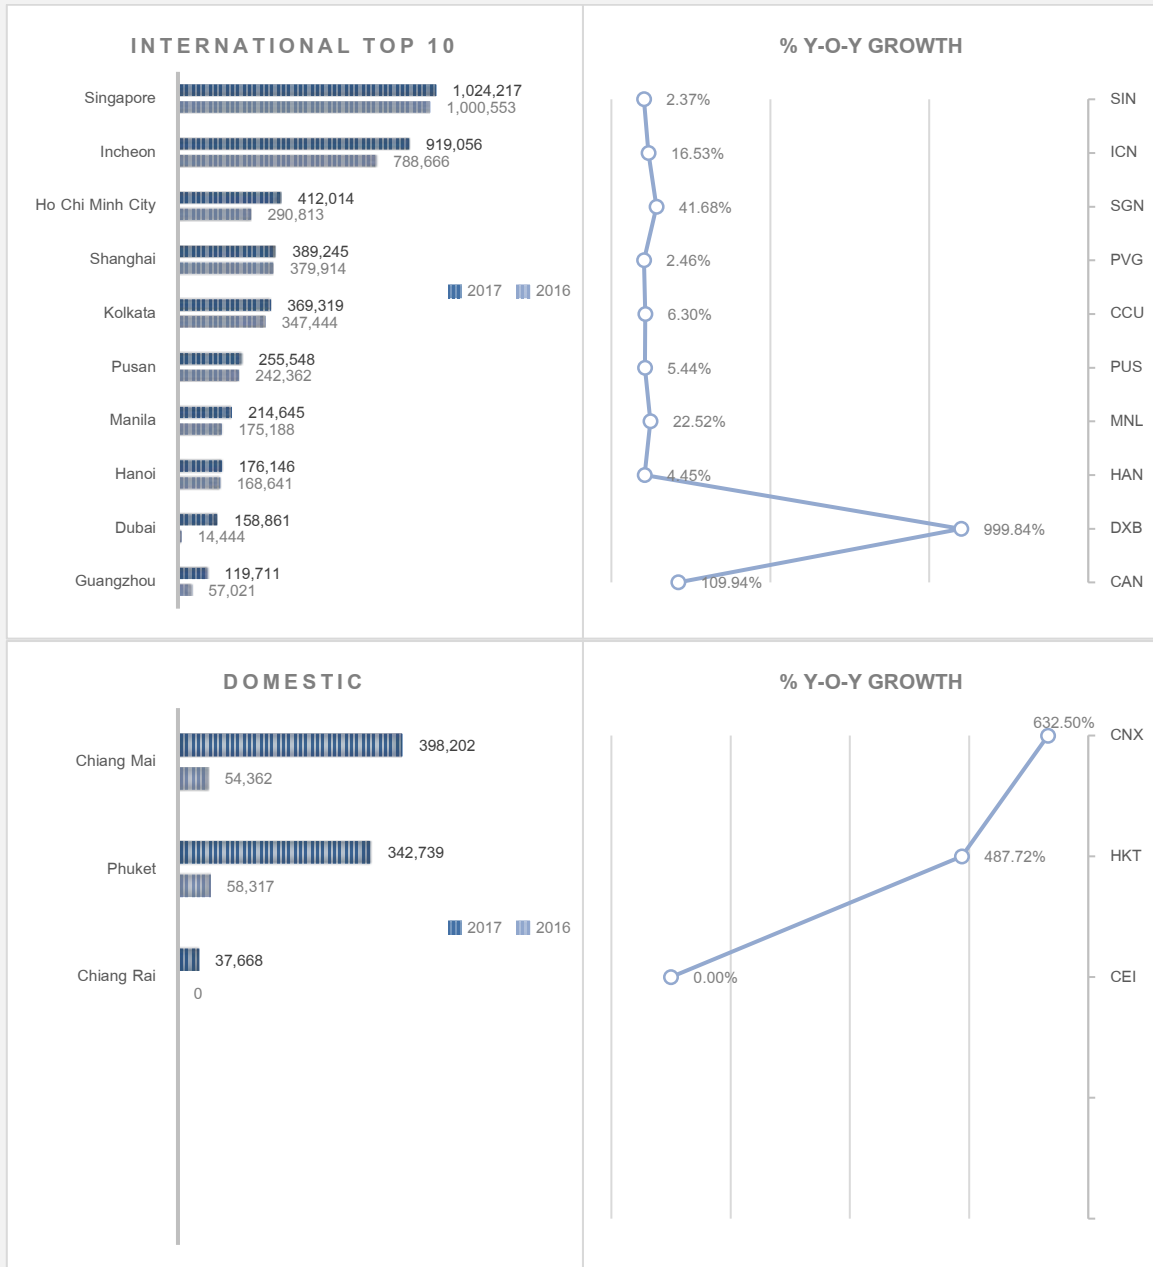

Chart 66: Top airports by LCCs' passengers at Don Mueang International Airport

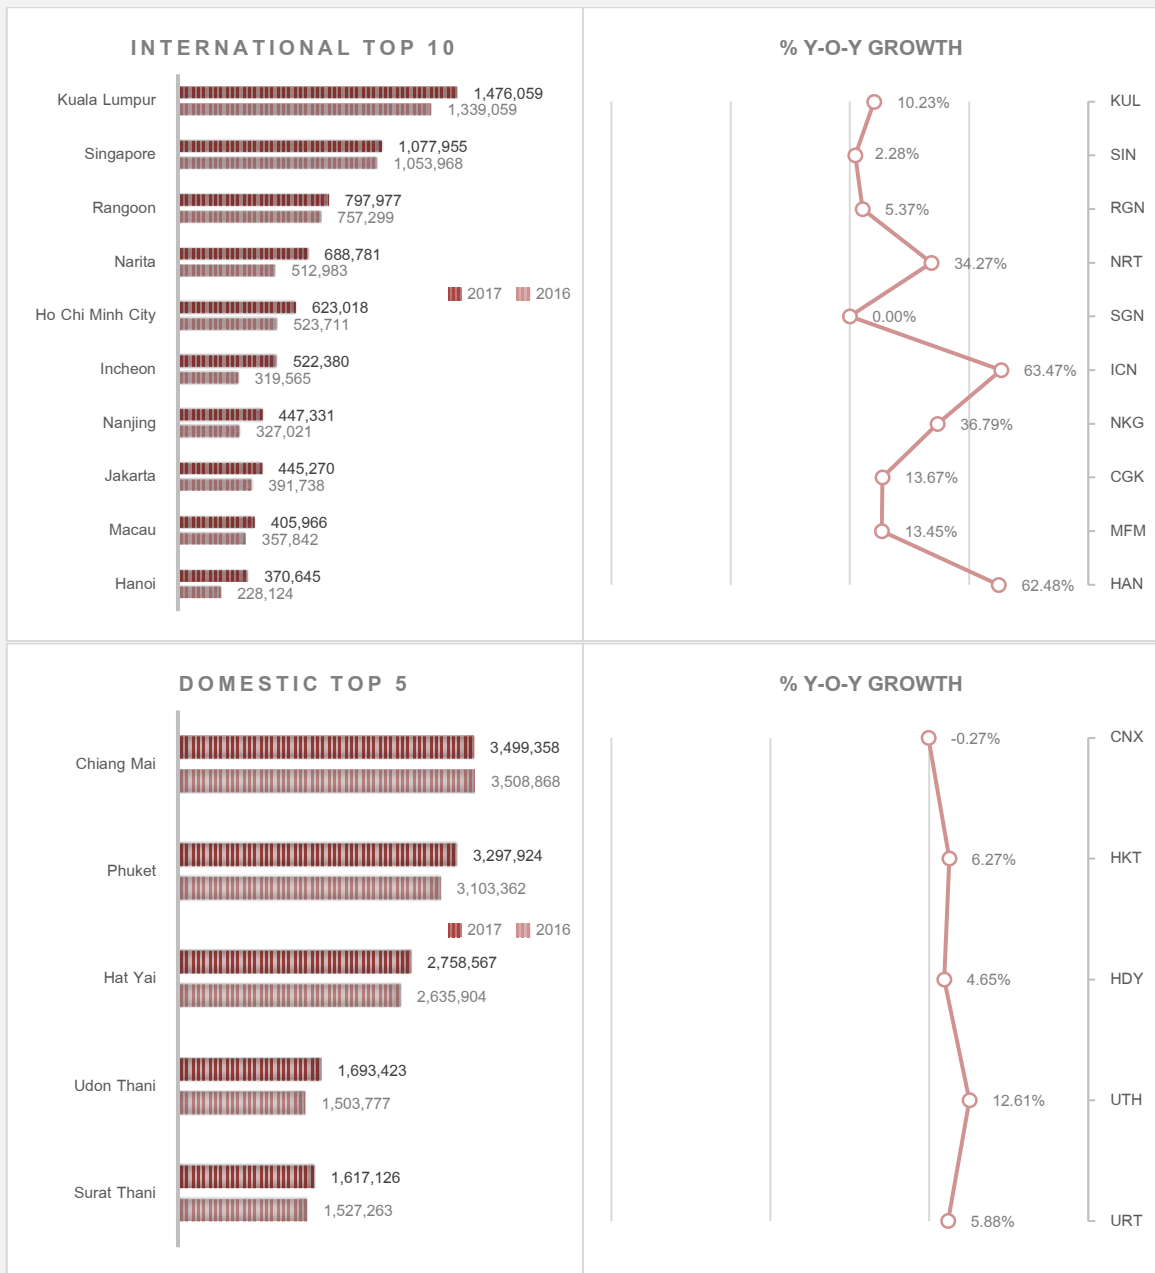

Chart 67: Top airports by LCCs' passengers at Chiang Mai International Airport

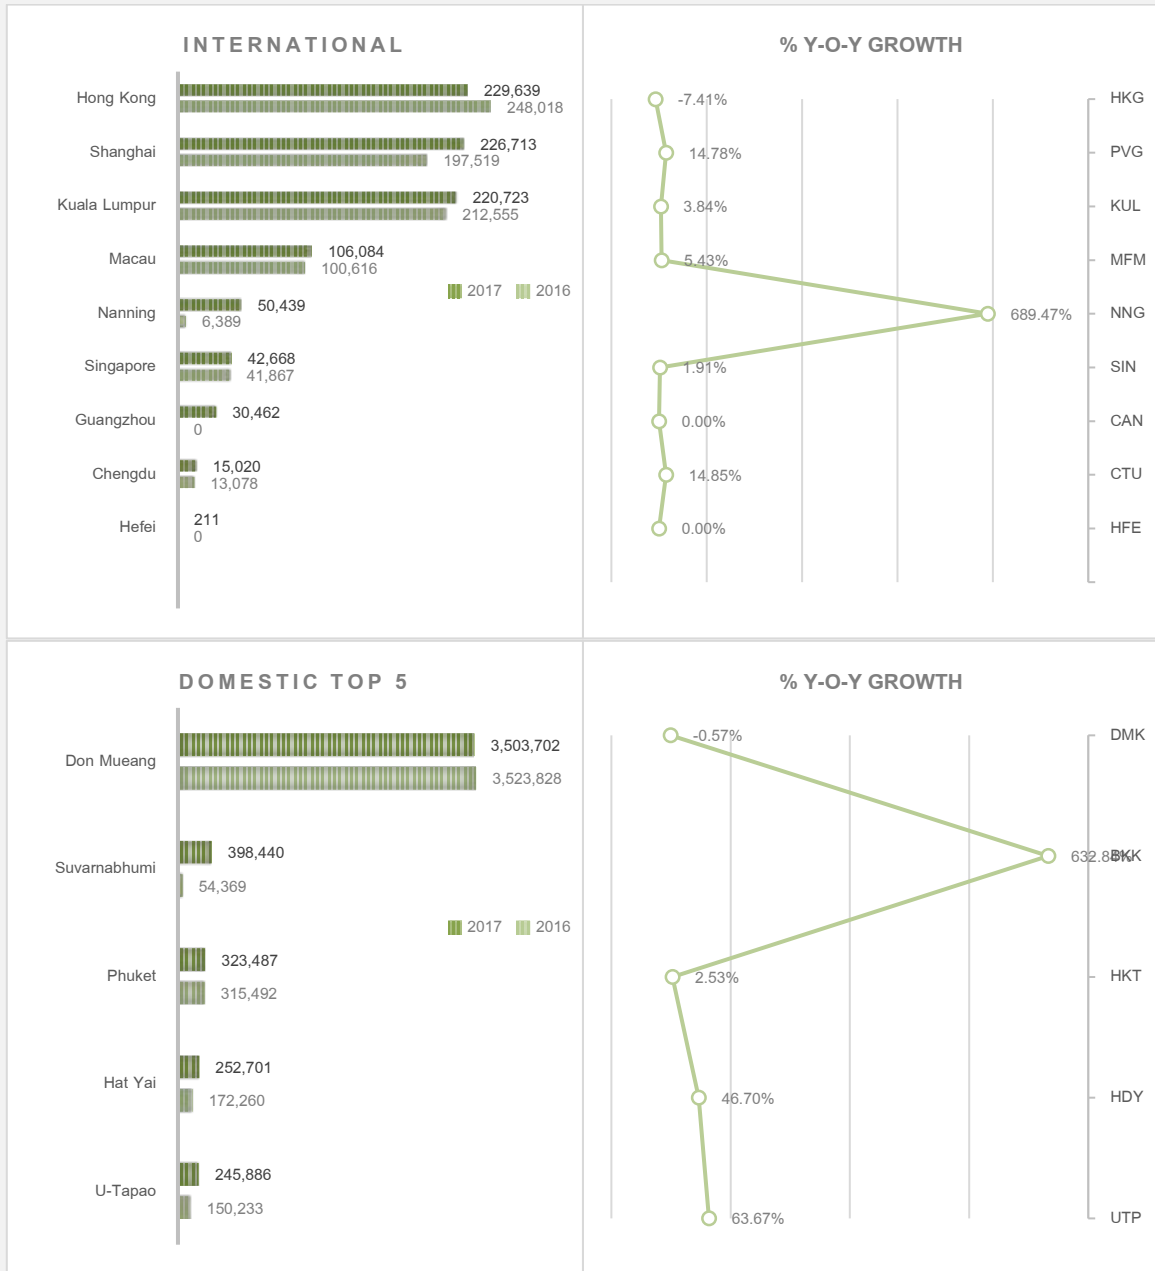

Chart 68: Top airports by LCCs' passengers at Hat Yai International Airport

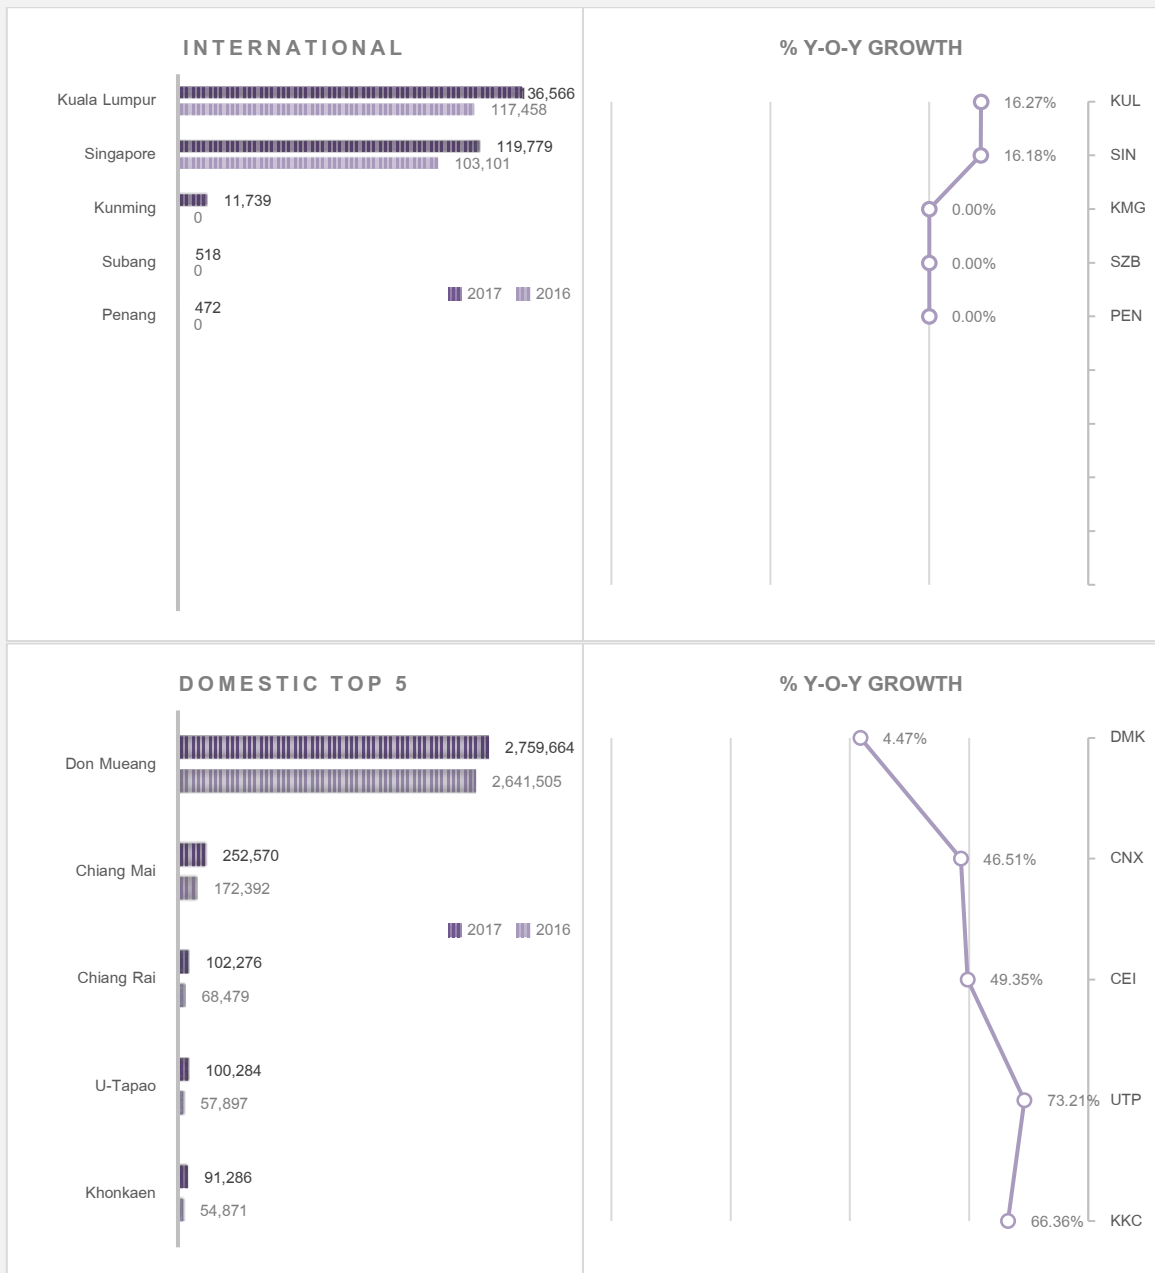

Chart 69: Top airports by LCCs' passengers at Phuket International Airport

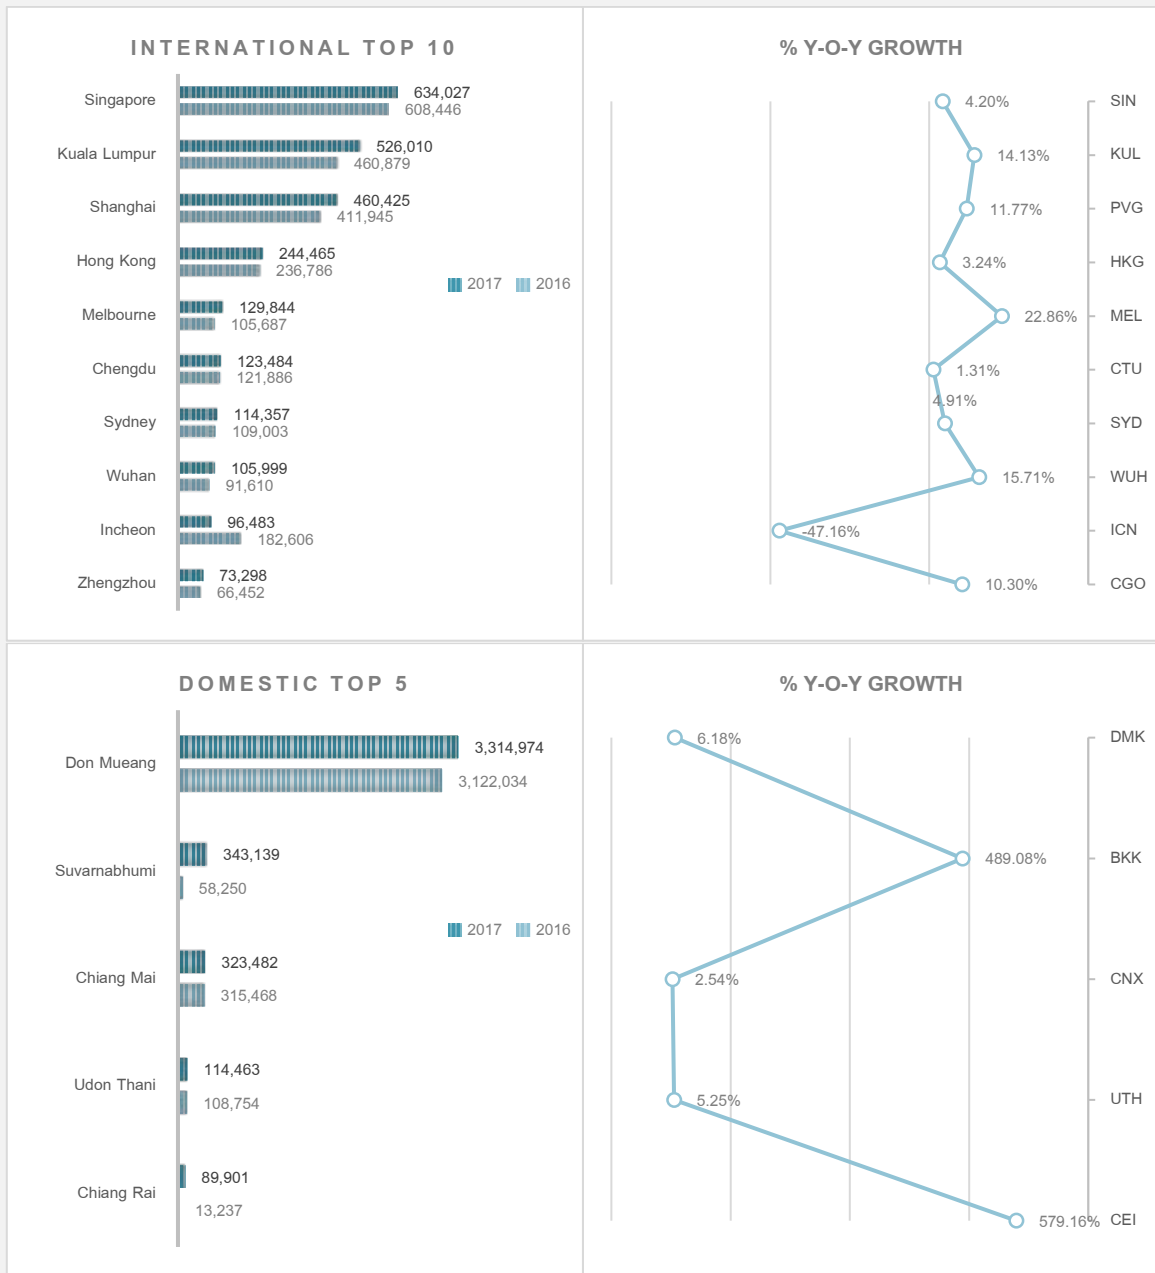

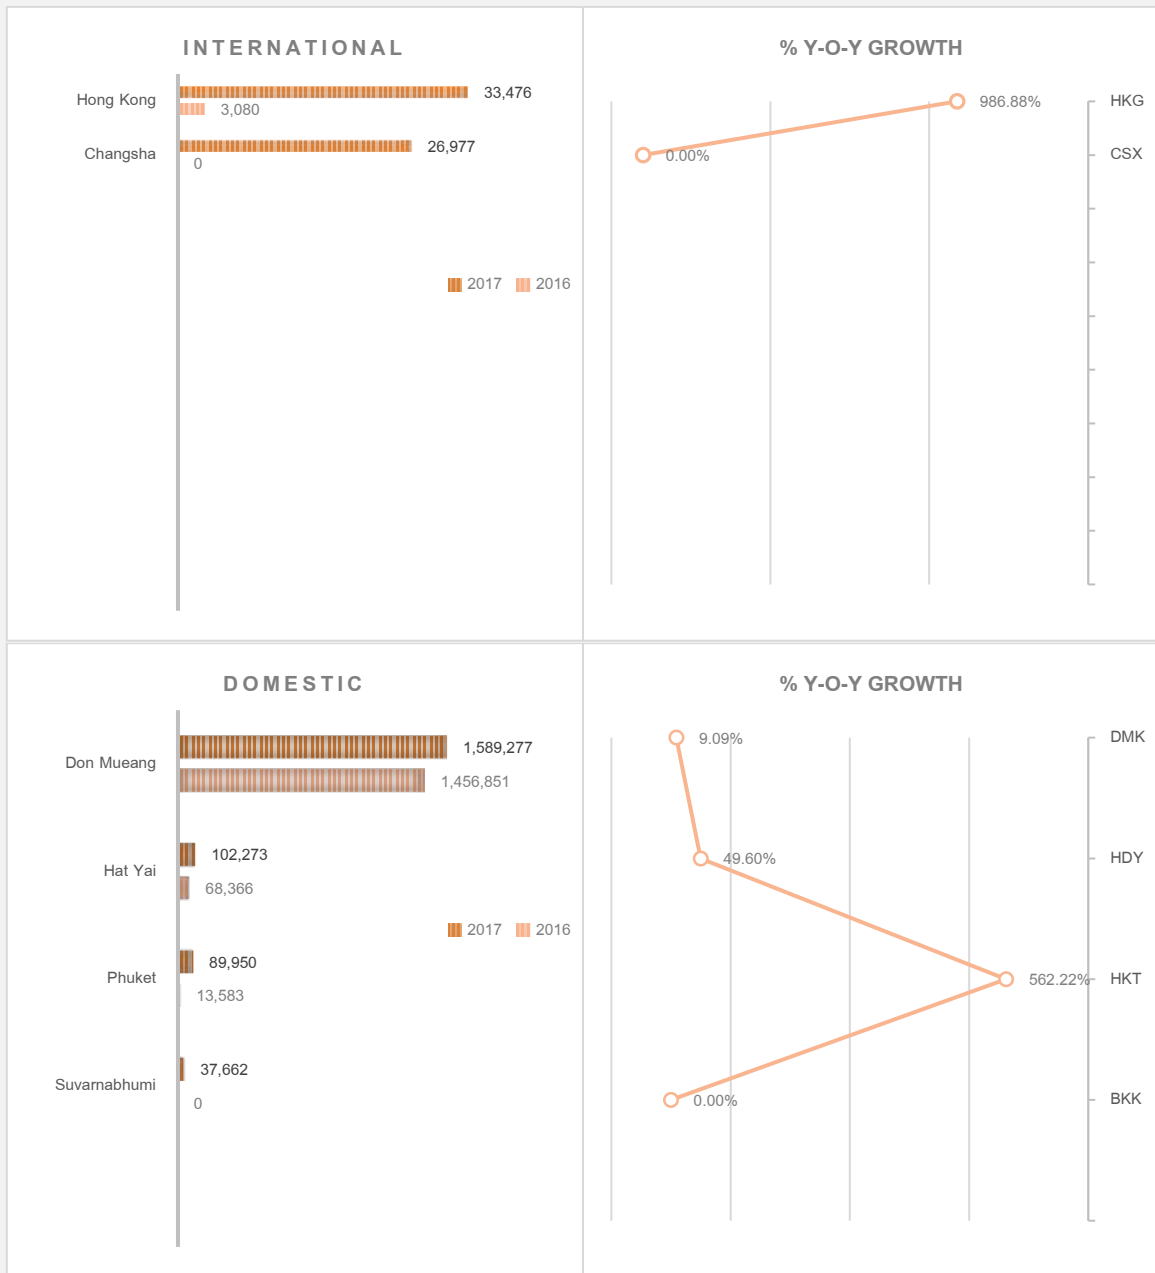

Chart 70: Top airports by LCCs' passengers at Mae-Fah Luang Chiang Rai International Airport

Remarks : Number of occupied seats = Number of Passengers = Disembarked + Embarked + 2 Transit
 Number of available seats = Number of flights x Average Capacity (Seats)
 Load Factor = (Number of occupied seats / Number of available seats) x 100

Remarks : Number of Occupied Seats = Number of Passengers = Disembarked + Embarked + 2 Transit

Number of Available Seats = Number of Flights x Average Capacity (Seats)

Load Factor = (Number of Occupied Seats / Number of Available Seats) x 100
